

Application for Delayed Billing Program

A customer who qualifies for this program is eligible for their monthly bill to be rendered on the last working day of the month. Rendering the bill on this date will allow the customer to receive the bill to coincide with the receipt of their pension and/or Social Security checks. All due dates and cutoff dates will be computed from this special billing date.

To qualify for this program, a customer's age must be 62 years or older.

The customer should submit in person, an application provided by the Clayton County Water Authority along with a picture ID as proof of their eligibility.

I hereby apply for the Delayed Billing Program of the Clayton County Water Authority. I understand that eligibility for this program requires proof of being 62 years of age or older, and I must be the responsible party for the water and/or sewer account.

I further understand under this program, that the Clayton County Water Authority will render my monthly bill on the last business day of each month. The purpose of this billing date is to have the bill fall due when my pension and/or Social Security checks are received at the first of each month.

All due dates apply to these monthly billings. Payment is due within twenty (20) days to avoid the 10% late fee. If payment is not received by the required cutoff date, my service could be discontinued.
