BUDGET TERMINOLOGY

Glossary

Acronyms and Abbreviations
Mr. John Chafin, Chairman
Members of the Board of Directors,
And Customers of the Clayton County Water Authority

I am pleased to present the Clayton County Water Authority’s approved operating and capital budget for Fiscal Year 2018 - 2019. The budget supports our Strategic Master Plan to finance all the Authority’s services, programs and capital needs during the upcoming fiscal year. It also positions the Authority for continued success in future years through steadfast commitment to provide quality water and quality services to our community. The budget is a product of the teamwork between our Board of Directors, Management Team and staff.

As our Executive Team goes through leadership changes, we remain confident that the Authority will continue to provide a quality product at a reasonable price with quality service. A true measure of our efficiency is a comparison of our rates to other utilities. The Authority’s rates continue to be among the lowest in the Metro Atlanta region and below average for all water utilities in the State. The Authority does not receive any tax revenue or other significant sources of revenue other than our rates for water, sewer and stormwater service.

Thanks to the encouragement of our Board of Directors, our Leadership Team has developed a robust Succession and Leadership Development Plan and the results of that work are shown by the capable team members who are stepping up into new leadership positions. These fresh faces will bring new ideas and energy to an already innovative and industry leading organization.

Our revenues continue to increase despite three years without rate adjustments and we are also significantly exceeding our Board’s target debt service ratio of 1.5 with a result of 2.7 for the last fiscal year. This has enabled us to fund our operational and capital needs for the coming year without a rate adjustment for our customers. The improving economy, the addition of new customers and the efficient operations by our staff have all helped us to avoid a rate adjustment. The 2018-2019 budget assumes our revenues will only increase 0.7% compared to the previous budget year. This estimate is significantly lower than the previous year’s actual result, but this follows our conservative approach to revenue projections in anticipation of a potential drought that could lead to water use restrictions or a contraction in the economy.

The consolidated budget request (water, sewer and stormwater services) is only slightly higher than last year based on the revenue estimate mentioned above. While personnel costs are increasing by over 7%, capital project funding
is decreasing by 34%. A significant part of the personnel increase is due to rising health care costs and our Board of Directors desire to absorb most of this increased cost rather than passing it on to employees. The decrease in capital project funding does not reflect a slowdown in our infrastructure renewal programs because these programs are being partially funded by a low interest loan from the Georgia Environmental Finance Authority and our strong debt service coverage ratio provides a significant amount of capital funding from our annual operating surplus. A continued investment in personnel is necessary to be able to accelerate these capital projects.

The capital projects budget continues to focus on pipeline replacement projects and improvements to our water resource recovery facilities. We are also making significant investments in monitoring and treatment at our water reservoirs and water production facilities to always provide high quality drinking water.

The Authority’s future financial position is strong with the retirement of our $21 million annual bond debt set to be retired in 2023. We are proud to be Clayton County’s water professionals and look forward to continuing to provide quality water and quality services to our community.

Respectfully submitted,

[Signature]

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation Award to Clayton County Water Authority, Clayton County, GA for the Annual Budget beginning May 1, 2017. To receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device.

This award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award. This is the Authority’s 12th year of receiving the award.
General Information

The Clayton County Water Authority ("CCWA" or the "Authority") was created via enabling legislation of the Georgia General Assembly (Georgia Laws 1955, page 3344) on March 7, 1955. This provided for the establishment of an authority to acquire, construct and thereafter operate and maintain projects embracing sources of water supply, distribution, sale of water, and related facilities. CCWA supplies water and wastewater services to over 280 thousand residents in Clayton County, in the metro Atlanta area. It is one of 15 counties included in the Metropolitan North Georgia Water Planning District.

In May 2007, the Stormwater Utility was created to help ensure compliance with stricter federal and state water quality standards. The Stormwater Utility is tasked with ensuring safe, efficient design and operation of stormwater management devices along with maintenance and repair of these structures and devices.

Mission, Vision and Values

The mission of CCWA is “Providing quality water and quality services to our community.” Our organization strives to value the environmental and community interests and sustain the resources entrusted in its care. Our Vision is “Utilizing Innovation to Provide Industry-Leading Service for Our Community.”

CCWA is a leader in the water utility industry, recognized for superior results in service, value, environmental stewardship, and innovation. The CCWA’s values include the following:

- **Excellence**: Providing the best value in product quality and service.
- **Great Place to Work**: Providing competitive benefits, career-focused training, and consistent and effective two-way communications while fostering a family-like spirit.
- **Integrity**: Employing the highest ethical standards, demonstrating honesty, fairness, and trust while respecting the rights and beliefs of our fellow employees, our customers, and our community.
- **Customer and Community Focused**: Anticipating and meeting customer expectations in both service and product while responding in a timely manner. Actively committed to the betterment of our community.

Governance

The Clayton County Water Authority is governed by a seven-member Board of Directors. Each of them serves on a part-time basis for a term of five years and may be reappointed for additional terms. Members of the Board are appointed by the Clayton County Board of Commissioners. To help ensure continuity in governance, appointments are structured in a staggered manner such that there should be no more than two new members in any given year. The Chairman, Vice-Chairman, and Secretary-Treasurer are elected by and serve at the pleasure of the Water Authority Board.
Structure
CCWA is comprised of **two enterprise funds** that utilize 70 business or budget units to track financial performance and budgetary oversight of its business-like operations.

The **Water and Sewer Fund** is used to account for water production activities, wastewater treatment services, and all primary executive and administrative functions of the Authority. This fund’s revenue is pledged for all long-term debt repayment. The fund’s operations are broken down into the six primary divisions below:

- **Executive**: Provides organization oversight and all administrative functions of CCWA. *Business Units 100’s includes 130’s - Customer Service, Meter Services and Customer Accounts (A/R)*
- **Water Production**: Produces potable water within the standards promulgated by federal and state regulatory agencies. *Business Units - 300’s*
- **Program Management and Engineering**: Plans and administers construction projects and major repairs of all plants, facilities, and distribution and collection systems. *Business Units – 500’s*
- **Distribution (Water Pipe Infrastructure) and Conveyance (Sewer Pipe Infrastructure)**: Installs and maintains waterlines, sewer lines, and meters. *Business Units – 600’s*
- **Water Reclamation**: Reclaims wastewater in conformity to highly regulated standards of federal and state regulatory agencies. *Business Units – 700’s*
- **General Services**: Provides inventory warehousing, equipment and vehicle repairs, maintenance of lift stations (water) and pump stations (sewer), and building and grounds maintenance. *Business Units – 900’s*

**Water Cycle**

![Water Cycle Diagram](image-url)
The Stormwater Fund is used to comply with initiatives prompted by the Clean Water Act to improve stormwater infrastructure, minimize flooding, and provide protection of local streams, rivers, and lakes. Services provided by this fund include construction plan reviews, inspections, floodplain management, illicit discharge/Illegal connection inspections, and maintenance of stormwater infrastructure within the road right-of-way and directly connected to the right-of-way. To cover the cost of these services, user fees are charged based on the amount of impervious surfaces located on a customer’s property.

- **Stormwater Management**: Directs, manages and controls the efforts of the Stormwater Utility section.
- **Stormwater Engineering**: Manages construction plan to ensure compliance with State and Federal regulations and mandates.
- **Stormwater Maintenance**: Maintains and repairs stormwater infrastructure within County.

Polluted stormwater runoff flows directly into our local streams, the Flint and Ocmulgee rivers and eventually the Gulf of Mexico.
Schematic of Fund Structure and Cash Flow Diagram

All transactions for both the Water and Sewer Fund and the Stormwater Fund flow through the Water and Sewer Fund.

INTRODUCTION

Water Operations

The Authority’s service area of approximately 143 square miles lies just south of the city of Atlanta. It is one of Georgia’s smallest counties, in terms of land size, yet it is one of the most densely populated counties with more than 285,153 residents. There are six incorporated cities located within the county which are Forest Park, Lake City, Lovejoy, Morrow, and the county seat of Jonesboro. The Authority is primarily a retail water utility that sells water directly to end users.

Our system annually delivers approximately 9.9 billion gallons of potable water and serves more than 80,634 customers. Our customer base is comprised primarily of residential users (94%) followed by commercial (5%) and industrial and government customers (1%). The Authority produces its potable water from raw water taken from its reservoirs and supplemental raw water withdrawals from the Flint River. In 1963, reservoirs were developed from flows from Little Cotton Indian River. The construction and development of water treatment facilities, companion reservoirs, and the return of reclaimed water provides capacity of 42 MGD. Current operations have resulted in an average production of 25.8 MGD.

The Authority owns and operates three water treatment facilities: W.J. Hooper, J.W. Smith, and Terry R. Hicks. The W.J. Hooper facility and its companion reservoirs: Hooper, Edgar J. Blalock, and Shamrock supply sufficient resources to provide up to 20 MGD of potable water. The J.W. Smith facility has the capacity to pump up to 40 MGD of raw water from the Flint River into the Shoal Creek Reservoir and its companion, Smith Reservoir. This provides the J.W. Smith facility with the resources to provide up to 12 MGD of potable water. The Terry R. Hicks facility gets its raw water from the J.W. Smith and Edgar Blalock reservoirs. The Terry R. Hicks facility has the capacity to provide 10 MGD of potable water to the Authority’s customers.

Wastewater Operations

This operation conveys, treats, and reclaims its customers’ wastewater. The Authority annually conveys and treats approximately 7.0 billion gallons of wastewater. Currently, the Authority serves approximately 65,593 customers. The Authority is comprised primarily of residential users (94%) followed by commercial (5%) and industrial and government customers (1%). Water reclamation facilities and wetlands provide the capacity to treat almost 39 MGD of wastewater. The Authority has also invested in the capacity of a neighboring facility (DeKalb Snapfinger WRF) to provide another 1 MGD of capacity. Currently, the average daily flow of these facilities is 18.3 MGD.

The Authority owns and operates three water reclamation facilities: W.B. Casey, Northeast, and Shoal Creek. Located in the central portion of the county, the W.B. Casey plant has the capacity to treat 24 MGD of wastewater while the Northeast WRF has a capacity to treat 10 MGD of wastewater. The Authority’s most recent constructed facility, Shoal Creek WRF, has the capacity to treat 4.4 MGD of wastewater. Shoal Creek WRF has a companion constructed wetlands treatment system that also provides 4.4 MGD of treatment capacity. This industry renowned system receives the effluent of the Shoal Creek WRF and directs it through terraced wetlands with various plants acting as biological filters providing additional treatment. The constructed wetlands, at the Huie site, provide a treatment capacity of 17.4 MGD.
of water. The Shoal Creek WRF and associated wetlands discharge indirectly into the Flint River, via the Shoal creek tributaries, while the Huie Wetlands are in the Ocmulgee basin.

**Stormwater Operations**

In response to the Clean Water Act of 1972, as amended, Clayton County established a Stormwater Utility to manage the quality and quantity of water flowing into our streams and rivers. Stormwater runoff is rainfall or snowmelt that flows from saturated permeable surfaces like roofs and paved driveways, sidewalks, parking lots, and streets. Stormwater runoff creates drainage and flooding problems and picks up pollutants such as oils, grease, fertilizers, pesticides, litter, and metal. This runoff is then collected and conveyed by ditches, culverts, intakes, catch basins, and storm sewers that discharge directly into creeks, rivers, streams, and lakes without being treated to remove the pollutants. The contaminants in stormwater negatively affect the quality of our local streams and lakes.

New federal laws regulating stormwater runoff require the Authority to develop and implement a comprehensive stormwater quality management program to protect and improve water quality. Clayton County is home to 28 large streams, 7 different lakes, and the origins of the Flint River. The Authority is tasked with inspection for physical damages, monitoring of water quality, maintenance of constructed infrastructure, and remediation of damages and serves over 80,166 customers.

**Interconnections**

**Drinking Water:** The Authority has six connections, all with the City of Atlanta, which can be activated on demand pursuant of a contract that expires December 31, 2023. The Authority has piping capable of providing about 8 MGD, in additional supply from these connections. Additional connections exist with the water systems of neighboring DeKalb and Fayette Counties, which can supply up to two MGD.

**Wastewater Treatment:** The Authority has a contract with DeKalb County for one MGD of capacity.

**Distribution and Conveyance Infrastructure**

The Authority maintains almost 1,500 miles of water distribution lines, 1,400 miles of sewer conveyance pipe, and 500 miles of stormwater pipe. Our pipes, laid end to end, would span from Miami to Seattle.
Out of the 159 counties located in Georgia, Clayton County is one of the smallest, in terms of land size, with an area of only 143 square miles. With 285,153 residents, according to most recent 2017 population estimates, it is one of the most densely populated counties in Georgia. There are six incorporated cities located within the county: Forest Park, a portion of College Park, Jonesboro, Lake City, Lovejoy, Morrow, and Riverdale, with the City of Jonesboro being the county seat. This suburban community is located just minutes south of downtown Atlanta and is an integral part of the Atlanta Metropolitan Statistical Area (MSA).
Transportation and Accessibility
An important attribute of Clayton County is its location in relationship to major transportation modes and the availability of several cost-effective alternatives for moving people and goods in the immediate area.

**Air:** Hartsfield-Jackson Atlanta International Airport, which lies mostly within Clayton County proper, is a major hub in the air transportation business and has been titled the busiest airport in the world since 2000. Hartsfield-Jackson Atlanta International Airport has annually recorded the largest amount of passenger traffic in the industry since 1998. In May 2012, the airport opened its new $1.4 billion international concourse. This concourse handled over 9.8 million passengers in its first year of operation.

Additional Hartsfield-Jackson Atlanta International Airport statistics:
- Has a direct economic impact of more than $32.5 billion for metro Atlanta area economy
- Has over 58,000 employees
- Terminal and parking areas of 4,700 acres
- Atlanta is within a 2-hour flight of 80% of US population
- 250,000 passengers a day
- 2,500 arrivals and departures

**Roadway/Motor Vehicle:** Four different interstate highways, I-75, I-85, I-285, and I-675, pass through a section of Clayton County. In terms of other major roads, U.S. highways 19, 23, 29, and 41, and eight state routes are also available to serve our citizens. There are approximately 1,400 miles of paved roads, expressways, and streets located within the County. Atlanta's beltway, Interstate 285, provides easy access to all areas of Atlanta and to east/west bound Interstate 20.

Other transportation needs of the local community can also be easily accommodated. The Georgia Regional Transportation Authority (GRTA) offers express bus service that provides workday commuters an alternative to driving their vehicles to downtown Atlanta employment centers. A large, conveniently located park and ride lot situated on a major arterial in Jonesboro provides access to this service. MARTA bus service also operates throughout the county.

**Rail:** For those businesses needing to move freight, there is direct rail service provided by the Norfolk Southern Railways System. In addition, Amtrak has passenger trains, which pass through nearby Atlanta. Approximately 30 freight truck lines serve the County with both intrastate and interstate service. In addition, the Greyhound Bus Line operates a local terminal in nearby Hapeville. Moreover, for international shipping, Savannah, Georgia and Jacksonville, Florida serve as major deep-water seaports, which can easily be reached by interstate highway in a matter of hours.
Education
The Clayton County Board of Education currently operates 65 public schools, twelve of which are high schools. There are also five private schools currently operating in the county. The higher education facility located in the County itself is Clayton State University, which is part of the University System of Georgia.

Some of the other institutions of higher education located in the Atlanta metropolitan area include Agnes Scott College, Atlanta University Complex, Emory University, Georgia Institute of Technology, Georgia State University, Kennesaw State University, Life University, Mercer University, Oglethorpe University, and Southern Polytechnic State.

Demographics and Economic Outlook
Median Household and Per Capita Income Statistics

To determine the stability and strength of revenue potential of an organization, including CCWA, the overall economic health of an area is accessed. Of the several economic indicators analysts look at to evaluate fiscal condition, those related to income, jobs and general strength of the regional municipality provide the most meaningful data. Median Household Income (MHI) and Per Capita Income (PCI) are indicators of how much money people have to spend. The higher the MHI and PCI, the more money people have to spend on discretionary items. Economists estimate that for every penny drop in gas price, the economy experiences an extra billion dollars in spending. With the drop in gas prices, more income will be used for discretionary spending like dining out, shopping, or home improvements.

Income growth is positively correlated with job growth and lower unemployment rates. Since the 1990’s, job growth in the southern crescent of Metro-Atlanta has largely been rooted in the construction that occurs during a strong housing market and economic expansion. Clayton County is on the cusp of this type of expansion due to the growth in the film industry and the development surrounding Hartfield-Jackson Atlanta International Airport.

A modern, extensive transportation and logistical infrastructure allows Georgia to compete effectively in a global marketplace. Hartsfield-Jackson International Airport is the world’s busiest passenger airport and 10th-largest in the nation for cargo. Georgia’s deep-water ports and inland barge terminals are a major reason Georgia now ranks second nationally in exports. With 5,000 miles of railroad track, Atlanta is the rail center of the South and the largest intermodal facility on the East Coast.

Several transportation projects, in various stages of development, in Clayton and Henry counties promise to open up previously closed transportation channels and ease congestion on busy Interstate 75. Clayton County voters approved a 1 percent sales tax last November to fund Metropolitan Atlanta Rapid Transit Authority bus service (MARTA), which should have more than 160 stops by July 2016. MARTA links the County’s workforce to major employers and activity centers throughout the Metro-Atlanta area.

Hartsfield-Jackson Atlanta International Airport is a powerful economic driver and two community improvement districts (CIDs), Airport West and Airport South (North Clayton County), have joined forces as the Atlanta Aerotropolis Alliance to assist the airport into becoming a major economic hub. These CIDs are coordinating plans for the creation of an “Airport City” that will attract new commercial office space, first-class hotels, entertainment venues, condominiums, apartments, and other residences.

The Atlanta Aerotropolis Alliance, comprised of businesses, local government representatives, nonprofits, and other key stakeholders, are playing a major role in forging Hartsfield-Jackson into an even stronger economic development
tool for the region. More than 50 percent of Fortune 500 corporate headquarters are located within 10 miles of U.S. hub airports and air travel. Both passengers and cargo are expected to triple between 2010 and 2030 in airports around the world. Airports are evolving into the actual destination of the traveler and not just places of departure and arrival.

As more businesses come into the area, more jobs will be created which spurs more amenities. This will start a perpetual cycle, as it will make the area an even more attractive choice for additional business relocations. The actual development and renovation of the airport will also provide additional jobs and economic impact. Hartsfield-Jackson recently unveiled its 20-year master plan that included $6 billion in projects. Approximately $1 billion will be spent in 2017. A list of some of the major projects and funding is outlined below.

The Authority’s service area will see economic gains from the development surrounding Hartsfield-Jackson Atlanta International Airport.

**Airport terminal**
- Terminal modernization, 2016-2018, $393 million
- Concourse T extension, 2016-2021, $200 million
- Plane Train people-mover turnback relocation, 2016-2027, $307 million
- Concourse G, 2016-2023, $983 million
- Concourse D gate area expansion, 2019-2025, $50 million

**Parking**
- ATL West parking deck next to Georgia International Convention Center, 2016-2017, $150 million
- Sullivan Road Park-Ride Lot, 2016-2018, $7.6 million
- Domestic garage enabling work, 2016-2021, $100 million
- South garage teardown and replacement, 2021-2024, $420 million
- North garage teardown and replacement, 2024-2027, $245 million

**Hotel**
- Hotel, travel plaza, mixed-use commercial complex, 2016-2018, $500 million

**Airfield**
- Taxiway/runway pavement replacement, 2016-2017, $24 million
- End-around taxiway, 2017-2021, $58 million
- Runway pavement replacement, 2021-2023, $35 million
- Other airfield renewal/replacement, 2016-2035, $310 million
- Sixth runway, 2023-2034, $943 million

**Cargo**
- Cargo building C, 2012-2017, $26 million
- Cargo building 1, 2017-2021, $22 million

**Support facilities**
- Fire station, 2016-2017, $16.4 million
- Building renewal/replacement, 2016-2035, $91 million
- Airport maintenance complex consolidation, 2022-2027, $37 million

Georgia is taking a leading role in the movie industry, which contributes 55,000 jobs and $7B in annual economic impact to the state. The *film industry* attracts multiple types of commercial and retail businesses to support its movie set building, actors, and stage crews. EUE/Screen Gems Studios Atlanta opened a 10-stage, 33-acre studio complex in 2010 on the former Lakewood Fairgrounds. Fayette County, Clayton County’s Southside neighbor, got an economic
INTRODUCTION

Boost last year when Pinewood Atlanta Studios opened a 288-acre complex with five state of the art sound stages. Clayton County will now benefit directly from the movie industry growth as actor and producer, Tyler Perry, has signed an agreement to build 16 soundstages on 330 acres of the 488-acre site at the closed Fort McPherson army base in East Point.

In February 2017, Los Angeles developer of film studios stated that it planned to build a five-stage, state-of-the-art studio complex in Clayton County, giving another boost to film production in the County. Managed by Pacifica Ventures, the new studio will be named Clayton County Studios. The new $12 million studio was built between Lake City and Morrow on 27 acres directly across the street from the National Archives in Morrow. Five sound studios being between 18,000 and 20,000 square feet each were constructed under the first phase. The complex includes production offices, post-production space, a green screen, mill and construction space, and a commissary. When completed, it will be the company’s second film-production studio in the United States. It has a nine-stage studio in Albuquerque, N.M., where hits like “Breaking Bad” and “The Avengers” were produced. The company chose the location because of its proximity to Hartsfield-Jackson International Airport and downtown Atlanta.

In 2016, Georgia Motion Picture Studios announced they would be calling Tucker, Georgia home. It is expected to have an additional $1 billion economic to the area’s economy. The University System of Georgia began classes in January 2016 at its new Georgia Film Academy to train future industry workers in the State. Clayton State University has recently followed suite by adding relevant courses to its curriculum catalog. With local talent available, production companies will no longer need to bring crewmembers from New York and Los Angeles.

Film tourism has also had an economic impact on the state. With additional studios and movie productions, this revenue stream will continue to grow. Fans from all over the world visit Senoia, Georgia, which was redeveloped to film the popular television show The Walking Dead. Covington has had similar success from The Vampire Diaries, which has a real-life replica of the Mystic Grill, a familiar setting on the show. The State’s film office has launched a website, TourGeorgiaFilm.com, to cater specifically to film tourism.

Porsche Cars North America completed the construction of its 26-acre complex at the former Ford Motor Company site in Hapeville. This complex includes its headquarters building, the Porsche Technical Service and Training Center, and the Porsche Customer Experience Center that features a 1.6-mile test track and handling road course. Walmart has recently completed its $108M new fulfillment center to process online orders. This location will employ 400 people over the next three years. The 1.2 million square foot facility is located at the Majestic Airport Center IV Industrial Park in Union City and opened late 2015.

The Forest Park Urban Redevelopment Agency is developing the Fort Gillem Army site for new industry and distribution centers. Kroger has hired 120 employees and is investing about $175M over a five period at the location. Castellini Group, a large distributor of fresh produce, has completed a $52M distribution facility that is creating 300

BUSINESS EXPANSIONS

- **Clorox**: $42M expansion; 100 new jobs.
- **Clayton Commerce Center**: $38M building constructed.
- **Cummins**: $10M New service and repair center and new parts redistribution center; 80 new jobs.
- **Waste Eliminator**: $7M new 41,000 square-foot building; 30 new jobs.
- **Low Temp Industries**: $17.5M new manufacturing headquarters building; 30 new jobs.
- **Fresh Express**: $10M expansion; 20 new jobs.
- **Kabobs Inc.**: $5M expansion; 7 new jobs.
- **TOTAL**: $130M investment; 267 new jobs.

Source: Clayton County Office of Economic Development and Film
new jobs. Castellini is a complete vertical supply chain company that provides services from tomato ripening and repacking, to processing and transportation.

The Tri-Cities Urban Redevelopment Agency is comprised of three Urban Redevelopment Agencies; Forest Park, Lake City and Morrow. These redevelopment agencies have a total of 2,350 acres and 935 individual parcels along 11 miles of commercial corridors in Clayton County and help encourage economic development.

**Job Growth and Unemployment Rates**

![Unemployment Rates Graph](image)

**Population Growth**

In a high fixed cost business like water utilities, the best way to keep rates lower is to have a larger population in a smaller area. The larger the population, the more customers available to share in the cost of the system and the closer they are together the less pipe and pumping costs needed to distribute the water.

Chief Executive Officers and their company boards are attracted to Georgia’s “pro-business” environment with state statutes that support low tax rates and prioritizes economic development. Georgia was the first southeastern state to pass single-factor corporate tax apportionment that applies the 6 percent corporate tax rate only to the portion of income earned inside the state. The state also consistently maintains one of the nation’s lowest debt-per-capita levels.
Quality and cost of labor are key drivers in every location decision. Georgia’s Quick Start work force development program is one of the best in the nation and provides customized training at no cost to qualified companies in an array of industries. Nearly one million workers at 6,200 companies of all sizes have benefited from Quick Start.

Thirty Fortune 1000 companies have headquarters in Georgia including General Motors, Hitachi, and Greenway Medical Technologies who are continuing to invest and expand in Georgia. Additionally, AT&T recently announced plans to build a research center in Atlanta to develop the company’s latest technologies and applications.

Water and Sewer Bill Comparison
The chart below shows single-family residential water and sewer bills for a typical customer using 4,000 gallons of water in comparison to other benchmark water utilities.

At $47.27, CCWA customers have an average combined water and sewer bill that is $12.51, or 21 percent, lower than our benchmark utilities charge their customers. The Authority is able to provide water to its customers at a reasonable cost by controlling its own costs.
The EPA sets a standard of affordability for average monthly bills. This standard is 2 percent of median household income standard or $68.23 for CCWA customers. Our customers pay $20.96 less than what the EPA deems affordable.

Financial Highlights and Trends

Water usage has steadily increased in all CCWA customer categories since FY 2014-2015. Although water usage was down slightly from the previous year due to the drought conditions experienced in FY 2016 – 2017, it continues to trend upward over the previous four years. Sewer usage, measured against water usage, has increased. The number of water and sewer customers has also increased each year since FY 2010 – 2011 in all CCWA customer categories, averaging 2 percent annual growth over the last three fiscal years.

The number of stormwater customers in all CCWA customer categories increased an average of 1.5 percent annually over the last three fiscal years. This customer growth is due to the continuing economic improvement in the County and surrounding metro area.

**Weather Conditions**

Weather influences both the supply and demand of water. Higher rainfall levels increase operating costs of a water utility. When surface water is the source of drinking water, more chemicals may be needed to treat drinking water. Heavy rain and wet conditions can cause infiltration and inflow (I/I) into sanitary sewer pipe systems meaning increased wastewater flows and chemical demands for treatment. Higher water flow levels increase the amount of time sewer pumps must run to manage the additional flow, increasing utility costs. With extremely rapid or heavy rainfall, additional labor hours are needed to maintain equipment at sewer pump stations and drain areas throughout the service area. It is estimated that up to 10% of water reclamation costs are due to the energy and treatment of the additional flows from I/I.

While operating costs increase, demand for the water *usually* decreases. Demand for water used for irrigation is the most obvious reason that demand drops during periods of high rainfall but also fewer showers and less drinking water is consumed because less work is done outdoors, and average temperatures are lower on rainy days.

The metro-Atlanta area received record-breaking rainfall during 2016 but water usage for the Authority remained relatively consistent with the previous year.

The amount of rainfall also affects the operating cost of Water Production. During severe drought conditions, water pulled from streams and rivers is less diluted and therefore contains a higher concentration of contaminants. This requires more chemicals to be used during the treatment of drinking water as does high temperatures and sunny days as it proliferates the growth of algae in our reservoirs.
Priorities and Challenges
The table below lists the challenges that the Authority faces and management’s approach to addressing these issues.

<table>
<thead>
<tr>
<th>Challenge</th>
<th>CCWA Approach</th>
</tr>
</thead>
<tbody>
<tr>
<td>Responding to Changing Economy</td>
<td>Continue balanced approach to funding projects: (1) focus on remaining debt from 2000 master plan, (2) “pay as you go approach” for most project needs, and (3) consider accelerated funding for key large programs and projects.</td>
</tr>
<tr>
<td>Workforce Continuity</td>
<td>Plan for and anticipate changes in CCWA’s workforce to limit loss of institutional knowledge.</td>
</tr>
<tr>
<td>Technology Advancement</td>
<td>Ensure operations utilize technology to allow CCWA to make best use of its resources.</td>
</tr>
<tr>
<td>Water Quality/Regulatory Issues</td>
<td>Evaluate micro-constituents in CCWA’s water supply reservoirs to determine treatment options, potential impacts to indirect potable reuse system and the cost implications should regulations be implemented.</td>
</tr>
<tr>
<td>Aging, deteriorating underground infrastructure</td>
<td>Utilize risk-based approaches to maintain, upgrade, and operate existing physical assets cost effectively.</td>
</tr>
</tbody>
</table>

Economic Factors
Maintaining a balance between the costs of system renewal, while maintaining affordable rates for our customer base, plays a large role in the timing of capital improvements. With the current customer base and usage levels, rates for both water and sewer would have to be raised by 1 percent for every $1M in additional cash flow would be needed. A major project underway is the Authority’s rehabilitation of its large sewer(533,772),(950,910)(89,770),(414,908), or trunk sewers, which is estimated to cost $60M and will require $6 to $14 million in capital funding per year. Other important capital projects are needed throughout the system and the risk of delaying work on these projects is too great to ignore until funding from general operations is available.

Intergenerational Equity is the concept that the beneficiaries of the service should be those that help pay for the service. Through monthly water bills, the customers of the system at any point in time pay for the everyday maintenance of the system plus help fund small to medium-sized projects through accumulation of funds in the Renewal and Extension Fund. For large projects that will benefit customers over several decades, funding through debt would be an equitable way to spread the cost of the project with those multiple generations of customers or citizens.

In January 2017, the Authority was awarded a $25M loan from the Georgia Environmental Finance Authority (GEFA) to fund a portion of its Large Sewer Interceptor Rehabilitation. The loan has an interest rate of 0.65% with a repayment
term of 15-years beginning when construction is complete. There is no prepayment penalty. If all the funds are drawn, the annual debt service will be $1.7M. Because this Clean Water SRF loan is subordinate debt to bonds, its debt service is not included in the calculation of our bond debt service coverage ratio covenant. The Authority has two additional GEFA loans that are in repayment. The first loan was used to finance the construction of one of the phases of the constructed wetlands. It has a current outstanding principal balance of $3.9M, and its final payment will be November 1, 2025. The second loan funded the addition of backflow devices within our distribution system. It has a current outstanding principal balance of $2.2M and matures on April 1, 2026.

CCWA has five bond issues with a combined outstanding debt of $121.1M. The final bond payment will be made on May 1, 2023 when the 2012 Series bond matures. The final retirement of bond debt will increase cash flow by $20M, making it available for self-funding capital projects needed.

Additional detail about the Authority’s debt can be found in the PLANNING AND DIRECTION section under Debt.

Workforce Continuity
The Authority has implemented a succession planning process to maintain stability in its operations as changes in staffing occur. The process includes routine evaluation of staff and critical positions by department managers and supervisors. It also includes periodic reporting of this information by managers to a “Talent Development Committee” comprised of human resource personnel and executive leadership.

Technology Advancement
Technology is a vital component of the Authority’s operation. As part of its strategic planning, CCWA addresses its information technology needs through a separate information technology master plan that is updated every three years. Twenty-two projects with an estimated cost totaling $15.5M are listed on the master plan. Of those projects, two of the largest are currently underway, the implementation of the new Customer Information System (estimated completion July 2019) and the JD Edwards Enterprise Resource Program (ERP) upgrade (estimated completion of phase 1 October 1, 2018). These projects are funded from the Renewal and Extension Fund, which accumulated funds from previous budget years. Both systems require the development of interfaces to the GIS/Cityworks application used to track the location of pipe infrastructure throughout the County as well as manage the maintenance and work on that infrastructure. The FY 2018-2019 capital budget includes $250K for this development along with other technology infrastructure improvements.
Water Quality/Regulatory Issues

Along with stormwater, the water and sewer industries are heavily impacted by both current and emerging regulations. The strategic plan lists eleven projects with total estimated costs of $46M that address water quality and regulatory issues. Of those projects, four projects are receiving $1.3M from the FY 2018-2019 budget. Two additional projects totaling $6.6M will be funded with part of the surplus from FY 2017-2018 budget, as directed by the Board of Directors at FYE 2018. A list of sixteen of the regulatory issues that may impact the Authority’s operations are described in the table that follows.

INTRODUCTION

Aging Infrastructure

The United States’ aging infrastructure has been discussed frequently by news media in recent months. The American Society of Civil Engineers have voiced concerns since the early 2000’s. The EPA estimates that over the next 20 years the price to repair the aging water infrastructure throughout the US will reach $335B. In our nation’s population centers, including the Metro-Atlanta area, sinkholes and water boiling notices are common occurrences as the underground water and wastewater pipe networks fail due to deterioration caused by age. Full replacement of Clayton County’s water, sewer, and stormwater pipes would range from about $800M-$1.6B and the Authority is systematically addressing the aging infrastructure in Clayton County with projects outlined in its strategic plan. This challenge consumes the lion’s share of budget dollars addressing stormwater, sewer and water pipe projects that total an estimated $220M over the ten years the plan covers. Of these projects, $18.5M in funding will be needed in the upcoming year with $4.1M of that amount included in the 2018 – 2019 budget. Loan disbursements will cover $6M of the Large Interceptor Rehabilitation funding need and the remaining $8.4M will be paid from the Renewal and Extension Fund with money accumulated from prior budget years.

As organized in the table that follows, the estimated annual cost of pipe replacement is $16M to $31M. Using an average lifespan of 50 years method and replacing 60 miles of line a year would cost $16M to $31M per year. Using the 90/10 rule that assumes that 90 percent of what is inspected is good and that 10 percent requires replacement, would cost $16M to $23M per year for inspection and renewal.

</table>

Several factors contribute to the lifespan of pipeline assets.

- **Age**: Over 300 miles of sewer pipe is older than an average 50-year lifespan
- **Material**: An important indicator of condition and lifespan
- **Corrosion**: Significant issue that affects lifespan particularly in concrete and ductile iron sewer pipe.
- **Construction Quality**: Quality of construction and inspection at time of installation are key to maximizing lifespan of a pipe.
Pipe Material and Age

**WATER PIPE MATERIAL**
- Asbestos Cement, 8 mi, 0.6%
- Cast Iron, 192 mi, 13.8%
- Ductile Iron, 1,124 mi, 80.7%
- Galvanized, 62 mi, 4.4%
- Other (Copper, PVC, Transite, Unk), 7 mi, 0.5%

**SEWER PIPE MATERIAL**
- DIP, 182 mi, 16.9%
- VCP, 519 mi, 48.4%
- PVC, 329 mi, 30.7%
- Concrete, 29 mi, 2.7%
- CIPP, 11 mi, 1.1%
- Other (Steel, Cast Iron, Other), 1 mi, 0.1%

**PIE TYPES:**

**Used in sewer systems:**
- PVC – Polyvinyl Chloride Pipe
- DIP – Ductile Iron Pipe
- HDPE – High Density Polyethylene Pipe
- VCP – Vitrified Clay Pipe
- CMP – Corrugated Metal Pipe
- RCP – Reinforced Concrete Pipe
- CIPP – Cured In Place Pipe
- Steel

**Used in water systems:**
- Concrete
- Cast Iron
- DIP – Ductile Iron Pipe
- Copper
- Galvanized
- PVC – PolyVinyl Chloride
Summary of Factors Influencing the 2018 - 2019 Operating and Capital Budgets

- A balanced budget supporting the goals of the Strategic Master Plan
- Maintaining affordable water and sewer rates for customer base
- Intergenerational equity of funding large projects
- New loan proceeds from Georgia Environmental Finance Authority (Clean Water State Revolving Fund program) for Large Sewer Interceptor Rehabilitation. Principal of $25M, interest rate of 0.65%, repayment term of 15 years.
- A shift in project priorities due to a water taste and odor issue in Fall 2017 that affected customers in the northern part of the County
- Water consumption consistent with previous two fiscal years
- Possible drought restrictions imposed by the Georgia Environmental Protection Division
- No new rate or fee adjustments

The 2018–2019 annual operating and capital budget for the Water and Sewer Fund remained relatively flat with the prior year budget, up less than 1 percent. Actual revenues for the fiscal year ending April 30, 2018 are estimated at $105.6M or 5.4 percent higher than budgeted.

Forecasted revenues for FY 2018–2019 are expected to remain flat with this year’s actual performance. Budgeted revenues for water and sewer sales were discounted by 2 percent to anticipate declines in usage due to water restrictions imposed by a drought response, changes in weather conditions, or rainfall. Estimated actual revenue in the current fiscal year from Installation Charges (Tap Fees) and Impact Fees were $853K and $1.1M, respectively. Because these fees are based on new construction and vary significantly from year to year, revenues from these sources were budgeted at the average amount received over the previous 5 years.

Additional favorable revenue variances to budget were due to the sale of timber, which accounted for $1.4M of the difference, and from a payment of $400K from the Forest Park Urban Redevelopment Agency for the partial cost reimbursement for pipe infrastructure. Revenue from timber harvests are not budgeted because a timber management consultant bases the timing of the harvest on weather and timber prices that can fluctuate significantly. The Authority entered into an Intergovernmental Agreement with the Forest Park Redevelopment Agency to assist in the County’s economic development efforts to convert the Fort Gillem military base into a large industrial and commercial center. The reimbursement from the redevelopment agency to the Authority occurs as companies locate within the new center. Because the timing of occupancy is unpredictable, revenues from the Intergovernmental Agreement are not budgeted.
Of the $100.9M in revenue generated in this budget year, $10.2M or 10 percent, will be reinvested in the utility system via capital equipment and projects. Another $22.7M or 22 percent will be used to repay debt utilized for previous capital projects and construction interest on the Authority’s recent loan for a portion of its sewer outfall rehabilitation project. The remaining $68.0M will cover operating expenses of the Water and Sewer Fund including salaries and benefits of employees. The Contingency Fund, an account within Operating Expenses, will hold $2.1M. This account is used to fund emergency projects if the need arises during the year.

Water and Sewer Fund Revenues as Percent of FY 2018-2019 Budget
Analysis of Revenues - Water and Sewer Fund

Revenue Budget Assumptions FY 2018 - 2019

Water Sales are forecasted at $50.5M in the upcoming budget year with $10.5M of that amount coming from base charges. This is $661K less than the previous budget year and $1.0M or 2 percent less than estimated actual performance of the year ending April 30, 2018. Sewer sales are projected to be $43.0M in the current budget. This is 1.6 percent lower than estimated actual performance. Base sewer charges comprise $9.5M of the total sewer sales.

Water and Sewer Sales are forecasted using the assumption that usage and the number of customers will remain consistent with the previous year. Revenues in this category were discounted due to potential drought restrictions that could restrict water usage and are in line with the average of the previous three years.

Estimated actual water sales to cities (College Park) will end $387K less than budgeted. The City of College Park has an agreement that it can purchase up to 3 MGD from the Authority but has no minimum purchase requirement. College Park also has a water purchase agreement with the City of Atlanta. Although there is no formal minimum purchase amount with CCWA, College Park has expressed its intent to continue to purchase at least 1.0 MGD. At this tier of usage, the City receives a reduction in its wholesale rate.
Installation Charges are revenues received from the installation of meters or other related infrastructure to provide water and sewer services. This revenue category was budgeted at $604K, the average actual revenue received in the previous five fiscal years.

Account Service Charges are revenues associated with the fees and charges for late and delinquent payment of utility charges. This includes late fees and penalties, bad check charges, and reconnection fees. These revenues are budgeted at $3.9M, which is consistent with actual performance over the previous five fiscal years.

Miscellaneous Income includes revenues received from system repair charges, sale of scrap materials, timber harvests, sale of fertilizer pellets, intergovernmental transactions, and property and cell tower rental fees. This revenue was budgeted at $426K, approximately the same as the prior year budget. Revenue is budgeted for this line by combining the minimum received for each category listed over the previous five years.

Interfund Transfer from the Stormwater Fund is the overhead that is allocated to the Stormwater Fund to cover its share of the Authority’s administrative expenses. This year’s budgeted amount is $1.4M. This is a monthly charge of $118K versus the $96K per month charged in the previous year. This fee is calculated using the prior fiscal year’s actual expenses for certain administrative departments.

**Operating and Capital Expense Budget Assumptions FY 2018 - 2019**

**Personal Services**

This expense category includes salaries, payroll taxes, pension, and medical or related benefits. As has been budgetary practice at the Authority, salaries and benefits are budgeted as if all full-time positions are filled for the entire year. This amount also includes increases for cost of living and merit of 2 percent and 3 percent, respectively, whether given or not. *Salaries and Payroll Taxes* of $22.5M and $1.7M combined for an overall budget increase of $751K or 3.2 percent over the previous year budget. For the last five fiscal years, the budgeted amount for *Salaries* had an average annual increase of 4.0 percent budget year to budget year. The $708K increase is due to net changes in new and eliminated positions and upgrades and downgrades of current positions. Actual salary expenses have been 6 percent lower than budgeted over the most recent five fiscal years.

Medical and related *Benefits* of $4.9M are $1.1M or 28 percent higher than the previous year budget due to recent increases in insurance costs. In fiscal year 2015 - 2016, the Authority adopted a self-funded insurance program for its medical, life, and disability insurances, which has provided more control over the cost of these benefits but still cannot completely curb the general escalation of cost for these benefits.

*Pension* expense of $3.1M is $175K higher than the previous budget year. Of the increase, $105K is the additional contribution necessary to maintain the set allocation between Clayton County employees and Authority employees of 85 percent and 15 percent, respectively. Because this line item is budgeted as a percentage of salaries, actual expenses for this line item average 6 percent less than the budgeted amount over the previous five years.
Operating Expenses

Operating Expenses are $35.0M for the new budget year and up 3.0 percent or $1.0M from the previous budget. This increase is primarily due to the increase of the amount budgeted for Outside Services, which is $1.5M higher in the current budget year. This increase is due to the implementation of recently completed projects and initiatives such as the monitoring and maintenance of the water quality projects completed at the reservoirs; services to connect additional plant equipment to the SCADA system; and annual security monitoring for the newly implemented security systems at plants and facilities throughout the Authority.

The Operating Materials and Supplies category of $4.2M is down $196K or 5 percent from the previous year budget. Chemical expenses make up about $2.0M of this category and remain flat with the previous year budget. Another large account in this category, is Other Materials budgeted at $1.5M. This account is budgeted at $314K lower than the previous year because large meter projects are now being funded and installed within the Renewal and Extension Fund. This line item includes various supply needs, not large enough to merit a separate expense account, and includes items from the warehouse such as washers, pipefittings, duct tape, and other miscellaneous supplies necessary in day-to-day utility activities. Other accounts in this category include Lab Supplies, Tools and Shop Supplies, Uniforms, and Technology and Software. The budgeted amount for each of these accounts remained flat with the previous budget year.

The Vehicle Supplies expense category includes gas, oil, diesel fuel, and tires with gas prices being the primary budgetary factor used. This line item is budgeted at $488K in the current fiscal year, which is down $26K from last year’s budget. Actual expenses in this category have averaged $492K over the previous five years and $415K over the previous three years due to dropping gas prices. Over the last five fiscal years, the Authority has purchased an average of 200,000 gallons of fuel, 108,000 gallons of diesel, and 92,000 gallons of unleaded. For every 1-cent drop in the price of fuel, CCWA saves about $2K.

Administrative Supplies expense category includes office and janitorial supplies, printing, and postage which is at $310K and is down $18K or 5.4 percent from the FY 2017 – 2018 budget.

The Special Purchases expense category contains the line items Water Purchases, Employee Recognition, Toilet Rebate, and the Hardship Assistance Program. These actual expenses are typically $100K or less a year. Due to a taste and odor issue in early fall of 2017, water was purchased from the city of Atlanta which increases the actual expense in this category by $866K. This category also includes the budgeted amount for Contingencies where additional funds are held after all budgetary requests are met. These funds are used for projects throughout the year, at the discretion of the General Manager and Board of Directors. This year the amount is budgeted at $2.1M, which is $730K lower than the previous year budget.

Utility expense is budgeted at $7.8M, which is $19K or 0.2 percent higher than the previous budget year.

Maintenance and Repair expenses have been budgeted at $1.4M, which is $113K higher than the prior year budget. Actual expenses over the prior five fiscal years have averaged $1.0M. The higher budgeted amount provides a safeguard against an unplanned repair caused by weather or emergency event.

Outside Services expense category of $12.2M is up $1.9M or 18 percent from the previous year budget. The increase in this category is due to annual services related to the completion of recently completed projects and initiatives. The implementation of the water quality Improvement projects account for $1.4M of the increase. These additional funds are budgeted for the leased oxygen tank and monthly oxygen deliveries at the Blalock reservoir and the equipment integration and monitoring of water quality at Hooper, Blalock, and Shamrock reservoirs. Security monitoring and maintenance increased this expense category by $200K due to the implementation of the organization’s security project.
The *General Expenses* category contains the expense line items of *Employee Bonding*, *Property Insurance*, *Training*, and *Annual Software License Fees*. At $3.3M, the *General Expenses* category has increased $379K or 13 percent from the previous year budget. The purchase of new *Annual Software Licenses* for security and Microsoft, as well as, increases from our major enterprise software vendors for our Customer Information System and Enterprise Resource Program accounted for $257K of the increase. *Property Insurance* and *Employee Bonding and Liability Insurance* accounted for $57K of the increase.

Operating Expenses - Percentage by Category Type

**Debt Service**

*Debt Service* includes the required bond debt service for the upcoming year of $21.1M; the principal and interest payments for two GEFA loans totaling $798K; and estimated interest-only payments for the new GEFA loan that will fund a portion of the large sewer interceptor rehabilitation project. Detailed information about long-term debt is in the *Planning and Direction* section of this document under the heading *Debt*. 
Capital Expenditures

*Capital expenditures* is the use of funds to obtain a long-term asset or extend the productive life of an existing asset used in the operations of a business over multiple year periods. Sometimes referred to as capital outlay, this category of the Capital Budget primarily accounts for the purchase of equipment and vehicles and can vary year to year. The current year budgeted request is $2.9M which is $1.2M higher than the previous year budget. The actual performance, over the previous five fiscal years, has averaged $1.6M. The increase in this budget year is due to the atypical replacements of larger equipment that includes a dump truck ($90K), a large box truck ($94K), a mid-size excavator ($89K), a skid-steer loader ($89K), and an aquatic vegetation excavator for the constructed wetlands ($78M). A list of planned capital expenditures can be found in the table that follows. A detailed listing of capital purchases is in the *Capital Budget* section of this document under the heading *Capital Expenditures – Water and Sewer Fund*.

Capital Project
This category of the Capital Budget involves projects that benefit the operations of the Authority over multiple years. CCWA differentiates Capital Projects from Capital Expenditures by defining a Capital Project as one that requires multiple resources to complete. These resources could include any combination of inside labor, outside labor, and various materials or products that require assembly or construction to become a long-term asset. The amount budgeted for the upcoming fiscal year of $7.4M is $5.1M lower than the previous budget year, based on project need. The average budgeted amount in this category, over the previous five years, is $9.4M. Amounts budgeted in this category exclude inside labor costs, which are included in the operating budget in the Personal Services category. Additional detail of capital projects funded in the FY 2018 – 2019 budget, is located in the Capital Budget section of this document under the heading Renewal and Extension Funded Projects – Detailed Listing by Project.

The current budget year forecast assumes revenue from water and sewer sales will be consistent with estimated actual financial performance of fiscal year ending April 30, 2018. Projected revenue from these sources were discounted 2 percent to anticipate a decrease in usage that might occur if water restrictions are imposed by Georgia’s Environmental Protection Division as a response to a drought condition.

The 2018 - 2019 Operating and Capital Budget of $9.8M is up $96K or 1 percent from the previous budget year. The fund has benefited from increases in occupancy rates as the economy continues to improve and new construction picks up. The additional revenue generated is being invested back into the system through capital projects.
Analysis of Revenues - Stormwater Fund

Revenue Budget Assumptions FY 2018 - 2019

*Stormwater Fees*: Fees are budgeted at $9.6M for the upcoming fiscal year. This is $97K or 1 percent higher than the prior year budget and $197K less than the actual revenue estimated for April 30, 2018. The FY 2018-2019 Stormwater Fees were budgeted with the assumption that revenues would remain consistent with estimated actual performance and discounted by 2 percent for a more conservative forecast.

Stormwater Fees are billed based on the amount of impervious service that a property owner has. With the creation of the Stormwater Fund in 2007, the impervious surface was determined based on aerials performed in 2006 and existing CCWA account information. Digital tax parcel data, a much more accurate assessment of impervious surface, was not available at that time. In late 2013, CCWA acquired updated aerial photography and impervious surface data along with digital tax parcel data. All *Non-Residential Customers* were reassessed, and fees based on the new surface area became effective January 1, 2016. Approximately $450K in additional Stormwater Fees have been generated using the new impervious surface data.

*Account Service Charges* are revenues associated with the fees and charges for late and delinquent payment of fees. This revenue was budgeted at $157K for the year, which is the historical average of actual performance over the last five fiscal years.

*Miscellaneous Income* is revenue received from the sale of scrap materials and other minor revenues and was budgeted at $4K, which is the minimum actual performance over the last five fiscal years.
EXECUTIVE SUMMARY

*Intergovernmental Revenues* are primarily funds received from federal or state grants. No grant revenues are anticipated in the upcoming budget year.

### Analysis of Expenses - Stormwater Fund

![Bar chart showing expenses](chart.png)

#### Operating and Capital Expense Budget Assumptions FY 2018 - 2019

**Personal Services:**
This expense category includes salaries, payroll taxes, pension, and medical or related benefits. As has been budgetary practice at the Authority, salaries and benefits are budgeted as if all full-time positions are filled for the entire year. This amount also includes increases for cost of living and merit of 2 percent and 3 percent, respectively. *Salaries* and *Payroll Taxes* of $1.2M and $94K increased $98K or 8 percent from the previous year budget. Stormwater Maintenance added a foreman position to assist with the backlog of service requests.

Medical and related *Benefits* of $296K are $97K or 49 percent higher than the previous year budget due to recent increases in insurance costs. In fiscal year 2015 - 2016, the Authority adopted a self-funded insurance program for its medical, life, and disability insurances, which has provided more control over the cost of these benefits but still cannot completely curb the general escalation of cost for these benefits.

*Pension* expense, a percentage of *Salaries*, also increased 8 percent from the previous budget year.

**Operating Expenses:**
Overall operating expenses, excluding *Personal Services*, of $2.8M were $196K or 6.6 percent lower than the previous budget year.
The Operating Materials and Supplies category is budgeted at $140K, which is down $30K from the previous year budget. Responsible for the decrease, is the reduction in Other Materials and Supplies.

Administrative Supplies expense category includes office and janitorial supplies, printing, and postage. This category was budgeted at $17K, which is up $3K from the previous year due to the purchase of office furniture for the new staff member and the replacement of existing office furniture and chairs.

The Vehicle Supplies expense has been budgeted at $52K which is up slightly over last year’s budget. This group of expenses includes gas, oil, diesel fuel, and tires with gas prices being the primary budgetary factor used.

Utility expense at $27K is up slightly from the previous year budget of $26K.

Maintenance and Repair expenses have been budgeted at $31K, which is $4K higher than the previous year. This category of expenses included maintenance or repairs of vehicles, construction equipment, non-construction equipment (i.e. trailers, light towers, generators, trash pumps, gas meters, pole cameras, chainsaws), and buildings and ground maintenance.

Outside Services expense of $2.1M is down $210K or 7 percent from the previous year budget. The primary expense line item in this category is responsible for the decrease is Consulting Fees. This account decreased due to changes in initiatives under taken in the upcoming year.

The General Expenses category contains the expense line items of Employee Bonding, Property Insurance, Training and Annual Software License Fees. The budgeted amount of $135K is $10K lower than the previous year budget.

Interfund Transfer to the Water and Sewer Fund is the overhead that is allocated to the Stormwater Fund to cover its share of the Authority’s administrative expenses. This year’s budgeted amount is $1.4M. This is a monthly charge of $118K versus the $96K per month charged in the previous year. This fee is calculated using the prior fiscal year’s actual expenses for certain administrative departments within the Water and Sewer Fund.

**Capital Expenditures:** Capital equipment is the use of funds to obtain a long-term asset or extend the productive life of an existing asset used in the operations of a business over multiple year periods. Sometimes referred to as capital outlay, this category of the Capital Budget primarily accounts for the purchase of equipment and vehicles and can vary year to year. At $537K, Capital Equipment is budgeted at $89K higher than the previous budget year due to the differences in cost of equipment purchases from year to year. A detailed listing of capital purchases is located in the Capital Budget section of this document under the heading Capital Expenditures – Stormwater Fund.

Capital Projects:
This category of the Capital Budget involves projects that benefit the operations of the Authority over multiple years. CCWA differentiates Capital Projects from Capital Equipment by defining a Capital Project as one that requires multiple resources to complete. These resources could include any combination of inside labor, outside labor, and various materials or products that require assembly or construction to become a long-term asset. Capital Projects are budgeted at $3.3M compared to the previous budget year amount of $3.6M. The amount budgeted in this category over the previous five fiscal years has averaged $3.1M. Amounts budgeted in this category exclude inside labor costs, which are included in the operating budget in the Personal Services category. Additional detail of capital projects funded in the FY 2018 – 2019 budget is in the Capital Budget section of this document under the heading Stormwater Funded Projects - Summary.

The 2018 - 2019 Operating and Capital Budget of $9.8M is up $96K from the previous budget year. These additional funds were used to increase the budget for Capital Equipment purchases.

Budgetary Analysis - Revenues and Expenses: Budget to Budget Comparison
(in millions)
Staffing Summary

The Authority’s goal is to balance the impact of new positions within the framework of the direction provided by our Board and work priorities established by management. This includes careful consideration of any staff changes to meet those work priorities and challenges as well as the impact of on service delivery to our customers. A chart denoting the most recent five-year history of the full-time equivalent (FTE) positions is below. A table is provided for an annual comparison of personnel for the current budget the prior two budget years. The detail of personnel by both Division and Budget Unit is in the OPERATING BUDGET section.

The Water and Sewer Fund overall staff was reduced by 0.4 FTEs. The Stormwater Fund increased by 1.0 FTE for an overall increase in staffing at the Authority by 0.2 percent.
To support and guide the utility into the near and distant future, CCWA has developed several programs and initiatives.

- **Strategic Master Plan (SMP):** A variant of the Master Plan. Created in 2010 and updated every 5 years. Most recently updated in June 2015.
- **Work Priorities:** Annual assessment and prioritization of capital projects and programs done as part of annual budget process.
- **Financial Plan and Cash Flow Analysis:** Financial and cash flow projections done as part of annual budget process.
- **Key Performance Indicators (KPIs) and Levels of Service (LOS):** Quantitative, measurable targets set to evaluate Board and Management priorities, reviewed on a monthly or quarterly basis.

**Strategic Master Plan**

Since 1960, the Clayton County Water Authority (CCWA) has developed 10-year master plans to identify regulatory challenges, growth drivers, and identify the infrastructure needed to respond to these conditions. In response to a decrease in growth following the rapid growth of the 1990’s, the development of another 10-year capital plan was not enough. In 2010, CCWA developed its first Strategic Master Plan (SMP). The change in our operating environment required that the Authority be more efficient and disciplined in not only in its operations, but also in how it prioritized its operating activities and its capital projects or programs. The first step in this process was to identify the major operational components or attributes that are required for our utility to effectively, efficiently and economically provide water, wastewater and stormwater services to our customers. From this effort emerged our strategic goals that provide the impetus for CCWA to address it challenges, improve its performance and continue its success. CCWA maintains the seven strategic goals first established in the Strategic Master Plan.

</tbody>
</table>

The SMP is a framework with tools for planning, managing and evaluating Authority-wide performance. It considers the long-term economic, environmental and social impacts – the triple bottom line – of CCWA’s business activities. It
also provides a design template to guide services, projects, and operations for CCWA’s departments and budget units. The Authority plans to use the SMP for a variety of objectives, from individual job goal setting and performance evaluations, to the annual Authority Board retreat and planning session.

The 2015 Strategic Master Plan (SMP) serves as an update to the 2010 SMP and will become the comprehensive guide in continuing to achieve CCWA’s vision of Quality Water, Quality Service. The approach taken to develop the plan prioritizes the operating and capital projects according to CCWA’s strategic priorities. Additionally, the projects are scheduled based on the priority, predecessor or successor projects, and other schedule requirements and a 10-year cash flow schedule.

Projects scheduled for FY 2017 - 2018 were incorporated into the budgeting process, and moving forward, this document will continue to support the strategic planning and budgeting process. A financial analysis was performed to assess the cash flow needs of the SMP projects, identify funding alternatives, and provide a recommendation for funding the plan. The financial analysis detailing cash flow generated from operations and Capital Improvement Plan need is located under the heading: **Financial Plan and Cash Flow Analysis**. Detailed cash flow need for projects within the Capital Improvement Plan is located with the **Capital Budget** section of this document under the heading **Capital Project Listing with Annual Cash Flow Requirements**.

Information Technology Master Plan

Over a nine-month period beginning in September 2011, CCWA embarked and developed its first Information Technology Master Plan (ITMP) separate from the Strategic Master Plan. CCWA has a significant investment in technology and realizes that information, reporting, support and resources must be available at the right time, in the right place, and in the right format to empower our company. Coordinated by a third-party contractor, a Technology Steering Committee of various department representatives was charged with the goal of establishing a vision and plan for how information technology can best be utilized. The committee examined our business practices, various software applications, company-wide hardware, wireless communication capacity and CCWA’s internal and external reporting or information requirements and needs. Because technologies evolve so rapidly, the ITMP will be updated every three years. The ITMP goals were:

- Improve the effectiveness of CCWA’s use and reliability of information technology;
- Align the various enterprise architectures (business, systems and technology) with the objectives of the Strategic Master Plan (SMP);
- Assess the efficiency of systems and controls to limit deficiencies.

In May 2012, an ITMP was completed to meet the operation and informational challenges of CCWA. Originally developed as a separate plan, the ITMP was combined into the SMP during the 2015 update due to the integral part technology plays in all facets of operations.
Work Priorities

Work Priorities are the result of an annual assessment and prioritization of capital projects and programs that is done as part of the annual budget process. Work Priority projects may come from the Strategic Master Plan or they can come from a department’s separate initiative. To prioritize and rank projects, a scoring template that contains the seven strategic goals is used.

During multiple workshops, beginning in September, the management team assesses each project’s impact on the individual strategies as they walk through the scoring template. A score of 1, 3, 7 and 10 are collaboratively assigned for each of the strategies with a higher score indicating more of an impact on that strategy by the project.

A score of zero is assigned if the project’s impact will have a negative or adverse effect on a strategy. The higher the overall score of a project, the more likely that it will be placed on the annual work priorities list and be included in the upcoming budget. The current list of Work Priorities can be found in the CAPITAL BUDGET section under Work Priorities – 2017 – 2018. A portion of the scoring tool is provided as an example below.

---
**Financial Plan and Cash Flow Analysis**

In conjunction with the Strategic Master Plan and updated annually as part of the budget process, a long-term financial plan and cash flow analysis is performed. This forecasting tool assists in determining if additional cash flow must be generated to meet projected capital projects and program needs while maintaining the debt service coverage required by bond covenants. The financial plans include applicable financial summaries for both the Water and Sewer and Stormwater Funds. The summary shows the cash flows generated by operations, annual debt service payments, debt service coverage ratio and the resulting increase to net position. Projected costs and revenues are estimates and subject to variations inherent in all projections. Consequently, the estimates are not precise predictions but rather as indications of expected trends given expenditure, revenue, and financing assumptions. These assumptions are based on CCWA’s policies, goals and objectives and represent management’s best estimates at the time.

Of the types of project financing, organizational preference is given to deferment of projects when possible, water and sewer rate increases and use of the renewal and extension fund over use of debt. In cases of large projects that benefit multiple generations of customers, *Intergenerational Equity* is taken into consideration.
Capital Improvement Need and Cash Flow Generated from Operations

Assumptions for scenarios and cash flow projections are on the following page

The Authority’s capital investments include projects defined in the Strategic Master Plan (SMP) in addition to projects defined annually as departmental work priorities if not have been included in the SMP. The project plan graphed includes all external costs associated with the projects and are included in the light blue segment of the vertical bars. Any internal expenses or labor associated with the CIP projects are represented in the projected operating expenses and cash available to disburse.

This graph represents estimated expenses associated with the optimal proposed Capital Improvement Program (CIP) projects and the projected cash flow available after all operating expenses and debt service payments are made. Project totals include a large interceptor, or trunk sewer, rehabilitation project that is estimated to cost $60M dollars. It should be noted that these scenarios are created for general analysis and discussion purposes only. Depending on board approval, project timing or scope can be altered, or the project can be eliminated from the plan to accommodate funding preferences. Scenarios using debt as a financing option can vary significantly based on amount borrowed, interest rate fluctuations, term of repayment, and structure of repayment.

Each line in the graph represents the available cash to spend on capital projects based on five different sample scenarios using combinations of three primary variables holding everything else constant. The scenarios are listed from the most conservative variables, Scenario A, to the least conservative, Scenario E. The three variables modeled include the impact on available cash from rate increases, operating expense growth, and proceeds from debt. The latest rate adjustment was adopted for the 2016 – 2017 budget and became effective May 1, 2017. Rate increases for Scenario C and Scenario D have not been adopted are used in the tables and graphs below to demonstrate the impact to cash flow of these adjustments.

All five scenarios include $25M in proceeds from a recently approved GEFA loan with an interest rate of 0.65 percent and a repayment term of 15 years. Scenario E assumes an additional loan of $25M, an interest rate of 2.0 percent, an interest only period of 3 years, and a repayment term of 15 years with level monthly principal and interest payments. Disbursements from this second loan would begin in FY 2020 – 2021.
Assumptions for Cash Flow Projections

At current water and sewer sales levels, each 1 percent rate increase generates about $1M in additional cash flow.

**Scenario A** (yellow line): Rate Increase-0%; Operating Expense Growth–3%; Debt Proceeds-$25M; Customer Growth–1.5%.

**Scenario B** (light green line): Rate Increase–0%; Operating Expense Growth-5%; Debt Proceeds-$25M; Customer Growth–1.5%.

**Scenario C** (dark blue line): Rate Increase-3% FY2020-21; Operating Expense Growth-3%; Debt Proceeds-$25M; Customer Growth–1.5%.

**Scenario D** (red line): Rate increase-5% FY2020-21; Operating Expense Growth-3%; Debt Proceeds-$25M; Customer Growth–1.5%.

**Scenario E** (light blue line): Rate increase-0%; Operating Expense Growth-3%; Additional Staff, Debt Proceeds-$50M; Customer Growth–1.5%.

**a) Operating Revenues:** Held constant in all 5 scenarios; addition to revenue detailed in Cash Flows from Projected Changes – items c) through h)

**b) Operating Expenses:** 3% annual operating expense growth in all Scenarios except Scenario B with 5% growth.

**c) Rev: Increased rates - consumption- Water (each 1%=$412K):** Additional revenue generated from water rate increases on consumption tiers. For every 1% increase in rates, approximately $412K in additional revenue is generated.

**d) Rev: Increased rates - consumption - Sewer (each 1%=$348K):** Additional revenue generated from sewer rate increases on consumption tiers. For every 1% increase in rates, approximately $348K in additional revenue is generated.

**e) Rev: Increased rates - base - Water (each 1%=$105K):** Additional revenue generated from water rate increases on base charges. For every 1% increase in rates, approximately $105K in additional revenue is generated.

**f) Rev: Increased rates - base - Sewer (each 1% =$95K):** Additional revenue generated from sewer rate increases on base charges. For every 1% increase in rates, approximately $95K in additional revenue is generated.

**g) Rev: Increased customer base:** Additional revenue generated from water and sewer usage from new customers; new development. Historical 1.5% growth in customer accounts was used to project this revenue stream.

**h) Rev: Tap Fees:** Additional revenue generated from new development; connection fees. Historical growth rate of 1.5% was used.

**i) Exp: Decreased/ (Increased) Operating Expense:** Unique expense in addition to 3% growth in item b

**j) Operating Transfers in – from Stormwater:** Interfund transfers from the Stormwater Fund to cover its share of administrative expenses incurred by the Water and Sewer Fund that budgets all administrative costs. A 3% annual growth rate is applied, consistent with the operating expense growth rate.

**k) Existing Bond Debt Service:** Bond debt service principal and interest payments are projected as payments made to the debt service accounts (sinking fund) and occur one fiscal year ahead of payments to bondholders (~$20.3M annually). Latest maturity of existing debt is May 1, 2023 from accumulated payments made to the Debt Service Account through FY 2022-2023.

**l) Existing GEFA Debt Service:** GEFA Loan CW02008 (Wetlands) matures November 1, 2025 and Loan DW00002P (Backflows) matures April 1, 2026.

**m) Proposed New Debt P&I Payments:** Principal and Interest payments on new debt – .65% interest rate, 15-year term, $25M in principal, level monthly payments. Scenario E adds an additional loan of $25M – 2% interest rate, 15-year term.

**n) Interest Only Payments:** Interest during construction phase of the project.

**o) Capital Expenditures:** Expense for equipment and assets not included in a Capital Projects. Annual growth rate of 2 percent.

**p) Cash Reserve for Contingency:** Funding reserved for emergency projects.

**q) Loan Proceeds:** Loan disbursements for construction of the large interceptor project.
Scenario A (0%, 3%, $25M):

The graph below illustrates the cumulative capital improvement funding need (blue vertical bar) in relationship to the cumulative cash flow available (horizontal line; per scenario) after operating expenses and debt service payments are made for each fiscal year. The yellow line shows the impact of Scenario A that assumes expense growth of 3 percent and is considered the most conservative option because cash flow is generated by tightly controlling operating expenses. This option produced a deficit of $15.2M through FY 2025-2026 between proposed capital projects planned and the cash flow available to cover the estimated costs and timing of those projects.
Scenario B (0%, 5%, $25M):

The graph below illustrates the cumulative capital improvement funding need (blue vertical bar) in relationship to the cumulative cash flow available (horizontal line; per scenario) after operating expenses and debt service payments are made for each fiscal year. **Scenario B**, with no rate increase in addition to expense growth of 5 percent, produced the largest cumulative funding shortfall of $44.5M over the remaining eight years of the ten-year forecasted period.
Scenario C (3%, 3%, $25M):

The graph below illustrates the cumulative capital improvement funding need (blue vertical bar) in relationship to the cumulative cash flow available (horizontal line; per scenario) after operating expenses and debt service payments are made for each fiscal year. **Scenario C** with a rate increase of 3 percent in FY 2019-2020 produced a cumulative funding surplus over the forecasted period of $1.0M over the remaining 8 years of the forecasted period.

</table>

The graph below illustrates the cumulative capital improvement funding need (blue vertical bar) in relationship to the cumulative cash flow available (horizontal line; per scenario) after operating expenses and debt service payments are made for each fiscal year. **Scenario D** assumed a rate increase of 5 percent in FY 2019-2020 and funding of $25M for the large interceptor project. This scenario had a surplus of $13.1M. Operating revenues increased $3.9M offsetting the average annual expense growth of $1.8M over the remaining 8 years of the forecasted period.
Scenario E (0%, 3%, Staff Inc, $50M):

The graph below illustrates the cumulative capital improvement funding need (blue vertical bar) in relationship to the cumulative cash flow available (horizontal line; per scenario) after operating expenses and debt service payments are made for each fiscal year. Scenario E, with no rate increase and $50M in long-term debt, produced the second highest funding shortfall of $27.4M over the remaining 8 years of the forecasted period.
The surplus or deficiency in cash flow based on the five sample scenarios are found in the table below. It should be noted that these scenarios are created for general analysis and discussion purposes only. Depending on board approval, project timing or scope can be altered, or the project can be eliminated from the plan to accommodate funding preferences. Scenarios using debt as a financing option can vary significantly based on amount borrowed, interest rate fluctuations, term of repayment, and structure of repayment.

(R=Rate Increase, E=Expense Growth, D=Debt Proceeds)
Cash Flow - Water and Sewer Fund

Scenario C (dark blue line): Rate increase – 3% in FY 2019 – 2020; Operating Expense Growth - 3%; Debt Proceeds - $25M to finance a major phase of an interceptor project estimated at $60M to complete. Scenario C was selected because it was the scenario that best met the funding requirements of the suggested capital project plan.

This six-year projection includes debt proceeds of $25M, an interest rate of 0.65 percent, an interest only period of 4 years – during construction, and level principal and interest payments amortized over 15 years. All assumptions are listed below.

a) Operating Revenues are estimated actual for FY 2018-2018. The operating revenue forecasted in FY 2018-2019 budget is held constant throughout the years of the projection. Changes in operating revenues are shown in the section with the heading, "Cash Flow from Projected Changes," to highlight incremental impact to cash flow of assumption.

b) Operating Expenses exclude depreciation expense because it has no impact to cash flow. A compounded annual growth rate (CAGR) of 3 percent was applied to all other operating expenses.

c) thru h) Cash Flows from Projected Changes in operating revenues assumes an annual rate increase of 5% for both base and consumption tiers for all water and sewer customers in FY 2019 – 2020 and then the historical annual customer growth of 1.5% is applied to all revenue types.

j) Operating Transfers in are from the Stormwater Fund to cover its share of administrative expenses incurred by the Water and Sewer Fund that budgets all administrative costs. Portions of those costs are allocated to the Stormwater Fund through an overhead calculation performed annually. A 3% annual growth rate is applied to this line item, consistent with the operating expense growth rate used.

k) For the cash flow analysis, all bond debt service principal and interest payments are projected as payments made to the debt service accounts (sinking fund) which occur one fiscal year ahead of scheduled payments required to be made to bondholders. The
2012 Bonds have the latest maturity of existing bond debt with the final payment to bond holders made on May 1, 2023 from accumulated payments made to the Debt Service Account through FY 2022-2023.

I) GEFA Loan CW20008 (Wetlands) matures 11/1/2025 and Loan DW00002P (Backflows) matures 4/1/2026. The loan agreements require Debt Service Coverage of 1.05x. GEFA loans are subordinate debt and bond covenants exclude their annual debt service payments from the 1.20x covenant calculation.

m), n) Proposed Debt Service shows loan proceeds of $25M; disbursed over 4 years with interest only during construction. With proceeds of $6M per year used to fund project costs. The interest rate is 0.65% with interest only paid monthly on the amount outstanding. Level principal and interest payments made monthly for 15 years beginning when construction is completed ($1.7M/yr.).

Scenario C (dark blue line): Rate increase – 3% in FY 2019 – 2020; Operating Expense Growth - 3%; Debt Proceeds - $25M.
Using information from the cash flow projection on the previous page, the estimated net position was calculated for the forecasted period through FYE 2024. Net Position at FYE 2016 was $468,100,602 and projected to increase by $31,899,398 to $500,000,000 at FYE 2018. This is presented as Beginning Net Position in the table above for FYE 2019.

Fund Balance is a term used for the net position of a governmental fund that is equal to the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net position is the residual of all other financial statement elements presented in a statement of net position. Both Authority’s primary funds are proprietary or enterprise funds and use the term Net Position in place of Fund Balance.

Net excess cash produced would add to Net Position whether these funds are invested in capital assets, restricted, or unrestricted. Unrestricted Net Position reflects resources accessible for use by the fund.

The Clayton County Water Authority’s financial statements are being presented in conformance with provisions of the Governmental Accounting Standards Board (GASB) Statement No. 63 “Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position” (GASB 63). As required by GASB 63, the Authority has classified net position into three components; net investment in capital assets, restricted, and unrestricted. These classifications of Net Position are defined below.

- **Net investment in capital assets:** This component of net position consists of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction or improvement of those assets. If there are significant unspent proceeds at year-end, the portion of the debt attributable to the unspent proceeds is not included in the calculation of net investment in capital assets. Instead, that portion of the debt is included in the same net position component as the unspent proceeds.

- **Restricted:** This component of net position consists of constraints placed on net position through external restrictions imposed by creditors (e.g., debt covenants), grantors, contributors, laws or regulations of other governments. This component would also include constraints imposed by law through constitutional provisions or enabling legislation. For the Authority, this component consists of a debt service reserve amount, the accrued amounts of debt service principal and interest for the next required payments, working capital and a reserve amount for the Renewal and Extension Fund required by bond covenants.

- **Unrestricted:** This component of net position consists of net position that does not meet the definition of “restricted” or “net investment in capital assets”. Generally, this represents those financial resources that are available to the Authority to meet any future obligations that might arise.

The Authority applies restricted resources first, when an expense is incurred, for which both restricted and unrestricted net position is available.

Assessing economic condition of a governmental entity involves consideration of factors that could have an impact on a government’s net position. This assessment includes trends in revenues and expenses and how net position has changed over time.
Debt
As needed to fund large construction projects, the Authority issues water and sewer revenue bonds in accordance with the Constitution and laws of the State of Georgia, including the Revenue Bond Law (O.C.G.A. Section 36-82-60 et seq., as amended). With the adoption of each bond resolution, the Authority creates a first lien on the “net revenues” of the System as security for the debt. Currently, the Stormwater Fund has no debt.

Unlike general obligation bonds that pledge the full faith and credit of the government, there are no statutory limitations on the amount of revenue bonds that can be issued by the Authority. Since a portion of the revenues being received must be designated for repaying the existing debt, the ability to issue additional debt is really a function of the rates that the customers are willing to pay for the services being offered.

Debt Service
As part of its bond issuance process, CCWA has promised the bondholders that the money that was borrowed from them will be paid back through a pledge of a portion of its revenue stream each year. To facilitate compliance with that revenue pledge, the bond agreements call for the Water and Sewer Fund to transfer annual debt service each month into a separate bank account. This ensures that sufficient funds will be available in our trust accounts to pay the principal and interest when it becomes due every six months.

The entire amount noted as Debt Service, $21.1M, represents the transfers from the Water and Sewer Fund into these individual bank accounts. Presently, the Authority has five different series of revenue bonds outstanding. The particular series denotes the calendar year in which those bonds were issued. In adhering to the repayment schedule, the monies that have been deposited into these separate accounts will be disbursed on November 1 and May 1 to cover any bond related expenditures. All of the Authority’s outstanding revenue bonds have an annual principal payment date of May 1 with interest paid semi-annually to the bondholders on May 1 and November 1. The payment that occurs on May 1, which includes the principal payment, is generally much larger and is considered to have transpired at the conclusion of the fiscal year for budgeting and cash flow purposes.

Debt Service Reserve
As an additional safeguard to protect the bondholders, the Authority is required to deposit into a separate debt service reserve account an amount equal to the highest annual debt service payable in any future year. As prescribed in the bond covenants, the current reserve requirement is $21.1M, which is the debt service payment for May 1, 2019. These “reserve” monies are held in an account by the trustee while the bonds are outstanding and would be available to make the debt service payment if for some unforeseen reason the Authority had to default on a payment. This reserve requirement had to be met by February 1, 2015 and the Authority has currently met this reserve obligation.
Outstanding Bonds
Clayton County Water Authority has a bond rating of AA+ from Standard and Poor’s Ratings Services.

SERIES 2009 WATER AND SEWERAGE REFUNDING REVENUE BONDS
On December 30, 2009, the Authority issued $17.8 million in Series 2009 Water and Sewerage Revenue Refunding Bonds. After redeeming the $2.8 million in bonds that mature on May 1, 2017, there will be an outstanding principal balance of $2.9 million on this series. The last principal payment made on this bond will occur on May 1, 2018.

SERIES 2011 WATER AND SEWERAGE REFUNDING REVENUE BONDS
On October 11, 2011, the Authority issued $13.2 million in Series 2011 Water and Sewerage Revenue Refunding Bonds to refund outstanding Series 2003 bonds and pay the issuance costs of the Series 2011 bonds. After redeeming the $1.6 million in bonds that mature on May 1, 2017, there will be an outstanding balance of $6.7 million on this series. The last principal payment on this series will be made to bondholders on May 1, 2020.

SERIES 2012 WATER AND SEWERAGE REFUNDING REVENUE BONDS
On March 1, 2012, the Authority issued $56.2 million in Series 2012 Water and Sewerage Revenue Refunding Bonds to refund the outstanding Series 2005 bonds. The first maturity is not due until May 1, 2021 and will have the final principal payment to bondholders on May 1, 2023.

SERIES 2013 WATER AND SEWERAGE REFUNDING REVENUE BONDS
On June 4, 2013, the Authority issued $64.9 million in Series 2013A and 2013B Water and Sewerage Revenue Refunding Bonds to refund outstanding 2003 and 2004 bond issues. After redeeming the $11.3 million in bonds that mature on May 1, 2017, there will remain a balance of $39.5 million outstanding on this series. The final principal payment for these bonds will be on May 1, 2020.
As of April 30, 2017, the Authority was obligated to make payments of principal, due on May 1, and interest due on May 1 and November 1, for various revenue bond issues as follows:

State Revolving Fund Loans

In addition to issuing revenue bonds in the long-term capital market, the Authority has two loans with Georgia Environmental Finance Authority (GEFA) in repayment and a recently approved $25M loan to assist in funding a portion of the $60M large sewer interceptor rehabilitation. In October 2002, the Authority entered into a loan agreement with GEFA for $4.2M to provide funding for the installation of backflow prevention devices on approximately 45,000 water meters. Backflow prevention devices are valves that block the reflux of water from a residence, commercial or industrial site from flowing back into the main water line, which could contaminate the water supply. The outstanding principal balance at April 30, 2018 is $2.0M with the final monthly payment on April 1, 2026. In May 2003, the Authority entered into a second loan agreement with GEFA for $7.7M to provide funding for the construction of one phase of wetlands at the Huie land application site. This constructed wetland project includes a flow distribution structure, approximately 13,500 feet of pipeline and the construction of a 55-acre wetlands wastewater treatment system with inlet and outlet structures. The outstanding principal balance at April 30, 2018 is $3.5M with the final monthly payment due on November 1, 2025. The Authority’s bond covenants allow for the exclusion of the debt service for these loans from Debt Service Coverage calculation because Georgia statute allows this debt to be subordinate.
Projected Debt Service Coverage - Water and Sewer Fund

The projected debt service and Debt Service Coverage Ratio is shown for the forecasted period through FYE 2024 using the cash flow generated by Scenario C using an annual rate increase of 3 percent for water and sewer, annual operating expense growth of 3 percent and Loan Proceeds of $25M.

Debt Payments - Debt Service Schedule

The table and graph below show the required debt service payments and the projected Debt Service Coverage Ratio.

### Debt Service Coverage - Graph

Bond covenants require 1.20x debt service coverage, excluding GEFA loan payments.

</tbody>
</table>

The projected net position above assumes that operating expenses will grow 3 percent annually. The Stormwater Fund has no debt obligations. The Stormwater Fund transfers money to the Water and Sewer Fund to cover its share of administrative charges. The transfer in prior years had been based on budgeted expenses of the Water and Sewer Fund. Beginning in this budget year, the Stormwater Fund transfer will be allocated based on the actual expenses incurred by the Water and Sewer Fund in the prior fiscal year. The projected growth of the transfer is 3 percent.

Net Position at FYE 2017 was **$51,354,452** and projected to increase by $2,409,343 to **$53,763,795** at FYE 2018. This is presented as Beginning Net Position in the table above.

Fund Balance is a term used for the net position of a governmental fund that is equal to the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net position is the residual of all other financial statement elements presented in a statement of net position. Both Authority's primary funds are enterprise funds and use the term Net Position in place of Fund Balance.

Net excess cash produced would add to Net Position whether these funds are invested in capital assets, restricted, or unrestricted. Unrestricted Net Position reflects resources accessible for use by the fund.

The Clayton County Water Authority's financial statements are being presented in conformance with provisions of the Governmental Accounting Standards Board (GASB) Statement No. 63 “Financial Reporting of Deferred Outflows..."
of Resources, Deferred Inflows of Resources, and Net Position” (GASB 63). As required by GASB 63, the Authority has classified net position into three components; net investment in capital assets, restricted, and unrestricted. These classifications of Net Position are defined below.

- **Net investment in capital assets**: This component of net position consists of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction or improvement of those assets. If there are significant unspent proceeds at year-end, the portion of the debt attributable to the unspent proceeds is not included in the calculation of net investment in capital assets. Instead, that portion of the debt is included in the same net position component as the unspent proceeds.

- **Restricted**: This component of net position consists of constraints placed on net position through external restrictions imposed by creditors (e.g., debt covenants), grantors, contributors, laws or regulations of other governments. This component would also include constraints imposed by law through constitutional provisions or enabling legislation. For the Authority, this component consists of a debt service reserve amount, the accrued amounts of debt service principal and interest for the next required payments, working capital and a reserve amount for the Renewal and Extension Fund required by bond covenants. The Stormwater Fund has no debt. The restricted amount is in an Escrow Account held until FYE 2019 for a watershed project.

- **Unrestricted**: This component of net position consists of net position that does not meet the definition of “restricted” or “net investment in capital assets”. Generally, this represents those financial resources that are available to the Authority to meet any future obligations that might arise.

The Authority applies restricted resources first, when an expense is incurred, for which both restricted and unrestricted net position is available.

Assessing economic condition of a governmental entity involves consideration of factors that could have an impact on a government’s net position. This assessment includes trends in revenues and expenses and how net position has changed over time.
Levels of Service and Key Performance Indicators

The Authority has implemented Levels of Service (LOS) performance measures, or key performance indicators (KPIs). These KPIs guide operational and capital activities and provide metrics that hold us accountable and responsive to the Authority’s mission and goals. Although the SMP focuses on a 12- to 18-month timeframe, the development and monitoring of these measures, indicators and metrics will have a direct correlation to successfully achieving our strategic goals and prioritizing budget allocations. The General Manager regularly reports to the CCWA Board of Directors the activities, actions and results of our performance.

To promote and encourage success, CCWA has developed a company-wide performance measurement-reporting tool. This online tool is accessible via the company intranet and each manager timely self-reports information for the applicable indicator, measure, or metric. Each manager also has developed a set of internal or non-reporting measures that provide for managing operations and external regulatory reporting. Whether reported via the reporting tool or maintained internally, CCWA plans to update regularly its performance indicators, standards, and guidelines.

The Key Performance Indicators (KPIs) and reporting metrics are organized according to one of 7 major goals supported by 26 primary strategies that are measured with 78 individual KPI metrics used to gauge performance against the benchmark.

</table>
BUDGET DEVELOPMENT

The operating budget policy answers some basic questions that include: how the budget is developed, who is involved in the budget process, what is included in the budget, if there is internal equity and if there is strategic direction.

The budget is developed in accordance with the priorities that are linked to the Authority’s financial and strategic plans set forth by CCWA. These are found in the Authority’s strategic master plans, the long-term financial plan, the needs of the community, and federal and state laws. Current priorities developed in conjunction with service levels are established and included in each department’s levels of service (LOS).

Board policy with respect to the Authority’s budget are as follows:

- The budget should support the Authority’s mission statement, strategic goals and critical priorities.
- The budget should be regarded as a business-operating plan.
- Balanced annual operating budgets are required for all funds. This means that total anticipated revenues and other financing sources must equal the total estimated expenditures and other financing uses.
- Rates and fees are evaluated and at the discretion of management and authorization by the Board, the authority establishes rate, fees and changes to make all payments required by the bond covenant, including the Authority’s operating costs and to satisfy its debt service requirement (minimum 120% of debt service on its bond obligations).
- In the initial stages of the budget process, all departments are required to submit requests for new personnel or changes in the existing positions to Human Resources Department.
- Each Department manager attends the annual strategic planning retreat. As part of a group exercise, participants are charged with the responsibility of establishing goals and objectives, setting operating and capital priorities and determining the strategic direction of the Authority.
- All departments will share in the responsibility of meeting policy goals and ensuring long-term financial health.
- Departments must justify each of their budgetary requests for funding. This allows the budget process to weigh all competing requests for resources within expected financial restraints.
- Senior Management evaluates all of the information that has been provided by the various parties and prioritizes requests based on level of funding available.

Basis of Accounting

The accounting term “measurement focus” is used to denote what accountants attempt to measure and report in a particular statement. The term “basis of accounting” refers to that point in time when revenues and expenses are recognized in the accounts and reported in the financial statements and on budget reports. Basis of accounting relates to the timing of the measurements made, regardless of the particular measurement focus is being applied. Because of what is being measured and reported, the Authority uses one measurement focus and basis of accounting for its accounting records and a different one for its budget.

Accounting Records

The accounting policies utilized by the Authority in the preparation of its financial statements are in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

With the Authority being operated as a business enterprise, the accounting records are maintained on the accrual basis of accounting. The measurement focus of the operating statement is on changes in economic resources (i.e.,
changes in total net assets). Such changes are recognized as soon as the underlying event or transaction has occurred, regardless of the timing of related cash flows (i.e., the accrual basis of accounting). For financial statement reporting purposes, all of the different segments of financial activities for the Authority’s Water and Sewer Utility are aggregated together and reported as a single entity.

Budget

In preparing the budget and determining a suitable measurement focus, two major conceptual differences have to be taken into consideration. The first of those is the reporting requirements of the bond covenants or ordinances. Based on the purpose of the appropriation in the Water and Sewer Utility, the flow of funds from operations must be segregated into one of the three following funds or subsidiary budgets: Revenue Fund, Debt Service Funds, or Renewal and Extension Funds.

As part of the budgetary structure, the basic unit of organization and operation within the Authority exists at the “fund” level. The Authority uses these funds to demonstrate legal compliance and to aid financial management by segregating transactions related to certain activities. In addition, since the user fees that we collect are associated with the provision of two different service classes, the Authority has to maintain two separate enterprise funds.

During the budget process, we are also concerned with balancing the amount of cash inflows and outflows. Accordingly, the Authority uses the modified accrual basis of accounting in preparing its budget. In this instance, the measurement focus is on changes in current financial, or expendable, resources to the extent that they normally are expected to impact near-term cash flows (i.e., the modified accrual basis of accounting). Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they are “measurable and available”). “Measurable” means the amount of the transaction can be determined and “available” means collectible within the current period or soon enough thereafter to pay liabilities of the current period.

Budget Process

The budget process is yearlong with the planning for the next fiscal year beginning in September of the year before and ending with the adoption of the budget in April.

September through December: The Budget Office creates a calendar with deadlines for the budget in September, which is approved by the General Manager. Department managers determine need for new personnel and any changes required to existing positions. They also assess need for new or replacement of equipment, vehicles, and capital projects that will begin in the next fiscal year.

In November, the Finance Department prepares a budget preparation package of material for every department. As all needed information is compiled, it is placed into each department’s electronic folder. The Budget Office uses the current payroll information to calculate salary and benefits needed for the upcoming year. By the end of December, all necessary material and instructions needed by a department to complete its annual budget request is available for Managers to begin creating department budgets.

January: Managers begin building their budgets by reviewing historical spending patterns of operating budgets, fuel and utility rate changes and capital needs. Department Managers have approximately one month for the request preparation period and input into the financial software package. During this month, the Finance Director analyzes the historical and most recent revenue collection data. Based on the identified trends and certain economic assumptions, the revenue projections are prepared and sent to the General Manager for review. Once reviewed and any changes are made the Budget Officer then enters the proposed revenues into the financial software system.
February: All submittals are cataloged and balanced, and then these are given to Executive Management, Finance Director and Budget Officer. An administrative review is then conducted by the Financial Director and Budget Officer that includes; clarification of any items as needed, adjustments to submittals where historical spending warrants, incomplete or missing forms from Department Managers.

An onsite capital review is conducted for each department requesting the addition of new or replacement vehicles, capital equipment and projects. The General Manager, Assistant General Managers, Department Managers, Finance Director and Budget Officer meet with the respective Department Managers. Once Executive Management has reviewed all requests, a final budget meeting is scheduled with each department to discuss changes in requested funding. The Budget Office compiles changes and distributes information back to Department Managers.

March: All recommended budget information is compiled by the Finance Department and placed in a bound copy of the proposed budget document.

April: The General Manager presents a balanced budget to the Board of Directors for approval. During this presentation the Assistant General Managers, Department Managers, Finance Director and Budget Officer are all on hand to answer any questions the Board may have before adopting the proposed budget.
After the Board adopts the budget, the Finance Director completes the formal budget document. The final budget is submitted to the Government Finance Officers Association (GFOA) to determine if it meets the criteria for the Distinguished Budget Presentation award. The adopted budget is posted to the CCWA website.

**August, November, February, and June:** After each quarter-end, the Budget Office prepares quarterly budget review workbooks for all departments and schedules budget reviews with each of the Department Managers, General Manager, Assistant General Managers, and Finance Director to review budget to actual performance, and distributes to Department Managers.

**Monthly Board Meetings:** The Finance Director prepares monthly budget to actual performance reports for the Water and Sewer Fund and the Stormwater Fund that is presented at each monthly board meeting.

*Budget revisions* can be made by department managers between object accounts within a budget unit. Revisions between business units, within a department, can be made with approval of the General Manager. All other changes are made with approval from the Board of Directors.

Strategic Planning:

- Department Managers Review Work Priorities
- Strategic Planning Retreat
- Work Priorities and Project Planning Workshops
- Work Priorities for Authority Scored and Ranked by All Department Managers
- Rate Analysis Performed based on Work Priorities for Next Year Budget
- Rate Increases Effective for current year budget

Budget Development:

- Human Resources completes a Personnel and Compensation Review
- Capital Assessment for Equipment, Vehicle, and Technology Replacement
- Finance Director prepares revenue Forecast for upcoming year
- Department Managers prepare draft Operating and Capital Budgets based on Work Priorities
- Budget Office compiles draft Operating and Capital Budgets
- Department Managers present Operating and Capital Budget to General Manager’s Office

Finalize and Adopt:

- General Manager convenes budget review team and makes recommendations
- Budget Office compiles revisions and changes made
- Budget Office prepares Final Budget and Board of Director’s Presentation
- Final Budget Presented to Board of Directors for Approval
- Budget Adoption
- Quarterly Budget Reviews with Department Managers
Rates and Charges
The Authority establishes a number of goals and objectives for the setting of retail water rates. A summary of the major goals and objectives include:

- Provide sufficient revenues for the operation, maintenance and repair of the systems consistent with good utility practice.
- Provide sufficient revenues to improve or maintain financial condition and bond ratings at or above levels equivalent to highly rated utilities.
- Meet requirements and covenants under all bond indentures.
- Set rates based on costs of service.
- Investigate and develop capacity fees for new development.
- Investigate and develop rate-based conservation incentives.
- Investigate and develop affordability programs for low-income customers.

Rate Objectives
A number of other rate objectives have been considered in developing rates. These objectives, together with other legal considerations, provide a basis for evaluating rate alternatives and selecting a preferred rate structure. The objectives include:

- **Conservation.** The rate structure should encourage customers to conserve water and to use water and sewer services in an environmentally sustainable manner.
- **Simplicity.** The rate structure should be easily communicated to customers who should be able to use their knowledge of the rate structure to predict the amount of their water and sewer bill.
- **Stability.** The rate structure should provide a reliable revenue stream such that small changes in residential use patterns should not lead to large changes in revenues. Rate adjustments should be minimized year-to-year to avoid large changes.
- **Fairness.** The rate structure should ensure that all customer classes pay their fair share of costs. Cost of service is a basis for evaluating fairness.

Each April, CCWA undertakes an internal evaluation of its rates structure and customer metrics to ensure that each of these goals and objectives is achieved.

Monthly Service Charges
CCWA’s rates include a base or monthly service charge applicable to all retail classes of service. The monthly service charge has two components, a fixed and a variable or volume-based charge. Certain costs such as meter reading and customer billing are equal for all customers and are included in the monthly service charge as fixed cost per account. Other costs such as meter maintenance and replacement are a function of meter size. While also fixed in type, these costs are included in the monthly service charge and are higher for larger metered accounts. Other costs are highly correlated to volume usage and are a part of the variable cost portion of the bill.

Stormwater Fees
Stormwater Fees for residential customers are a flat rate of $3.75 per household. All non-residential customers are charged based on the square feet of impervious surface on the property. An impervious surface unit is calculated by total square feet of impervious surface divided by 2,950; that amount is then multiplied by $3.75 to compute the fee assessed. Impervious surfaces are mainly artificial structures such as roads, sidewalks, driveways, parking lots and rooftops that are covered by impenetrable materials such as asphalt, concrete, brick or stone. These materials, as well as highly compacted soil and gravel surfaces, prevent rainwater from soaking into the ground. This creates runoff that causes problems including flooding, water pollution, and stream bank erosion.
Adopted Retail Water Rates

The summary of Approved Retail Water Rates reflects water rates per 1,000 gallons approved by the Board. The following rates are effective May 1, 2016 and have been taken into consideration for the current budget year, FY 2018 – 2019.

The primary purpose of the Operating Expenses section is to provide the reader with detailed information about the expenses that are programmed for each department and budget unit. To provide the user with various levels of detail for their analysis, the information is first provided at the individual fund level. This aggregate expenditure data is then broken down and presented at the departmental level and then finally at the individual budget unit level. The data contained in this section identifies the amount of resources that are being allocated for specific purposes; gives a breakdown of expenses by object account; and provides some historical context for those amounts.

To help the reader place the appropriated amounts in the proper context, the major responsibilities, and tasks being performed for each budget unit are described. For each budget unit, significant changes in appropriations and staffing levels are noted. Full-time equivalent information by personnel class is included to show staffing needs over time.

This section is organized by the Utility Fund. The Water and Sewer Fund has six primary divisions. Each division’s section includes: (1) an Organizational Chart, (2) Summary of Staffing by business units within the division, (3) Major Objectives for each division, and (4) Levels of Service (KPI’s) for that division. A detailed staffing list by business unit follows each division’s summary section. The Executive Division is presented with a separate summary for each of its individual business units.

Operating budgets are provided at the consolidated division level and then followed by individual business unit budgets.

Overview of Water and Sewer Utility Revenue Fund

The Clayton County Water Authority has developed and maintains a fund accounting system to ensure that the financial activities of the Water and Sewer Utility are properly recorded and reported.

The Revenue Fund serves as the principle operating fund of the Authority for the provision of water and sewer services to its customers.

The creation, maintenance and accounting methodologies of the Revenue Fund are required by the existing revenue bond ordinances.

The Authority is required to deposit all receipts from the operation of the water and sewer system, or from properties in connection therewith, into the Revenue Fund.

The Authority is permitted to use monies on deposit in the Revenue Fund to pay the reasonable and necessary costs of operating, maintaining and repairing the water and sewer system.

As a means of ensuring the availability of cash to meet immediate cash flow needs, the bond ordinances require that the Authority maintain a working capital reserve of $500,000.

The new revenues remaining in the Revenue Fund after paying normal operating expenses and funding the working capital reserve are pledged under the bond resolutions to the payment of the debt service on the revenue bonds that have been issued.

The Authority has covenanted that it will establish, revise and maintain rates, fees and charges to the extent necessary that they generate funds sufficient at all times to (1) maintain and operate the system on a sound business like basis, (2) pay the required debt service amounts into the bond sinking fund, and (3) maintain a reserve for extensions and improvements to the system.

Functional Breakdown of Departments for Budgeting Purposes

Executive
Water Production
Program Management and Engineering
Distribution and Conveyance
Water Reclamation
General Services
Clayton County Water Authority

“Providing Quality Water and Quality Services to Our Community”
The Executive Department is composed of the typical oversight and administrative functions required in a service provider type of organization. The principal components include management, human resources, information technology, financial services, and customer service.

The General Manager is responsible for the overall administration and direction of the Authority in keeping with the Board of Directors’ policies and with federal and state laws, rules, and regulations. The General Manager provides general direction to two Assistant General Managers (AGM). One Assistant General Manager is over support services and guides the Directors of Human Resources, Finance, Information Technology, Risk Management, Customer Accounts, Program Management and Engineering, the Public Information Office and General Services. A second Assistant General Manager is over Operations and guides the Managers of Water Production, Water Reclamation, Distribution and Conveyance, and General Services. Those Directors and Managers are then responsible for the day-to-day operations of their individual functions. To better manage operating expenses, the department is broken down into specific programs, activities, or functional areas of responsibility and are listed below.

101 - General Manager
102 - Human Resources
104 - Public Relations
105 - Board Members
106 - Information Technology
109 - Contracts, Compliance and Risk Management

110 - Finance
130 - Customer Accounts Director
131 - Meter Services
132 - Customer Accounting
135 - Customer Service

Overview of Department Responsibilities

The primary responsibility of the Executive Department is to provide administrative and support services to the operating departments. Functional responsibilities include strategic management, human resources, customer service, information technology, business services and public relations. The activities are performed in accordance with federal and state laws which govern water distribution and wastewater collection systems and the various support responsibilities. The activities in this department also provide support services to the Stormwater Utility Fund. Tasks are generally undertaken based on the policies established by the Board of Directors and the priorities established by the General Manager.

Major Business Unit Functions:
Serves in the Chief Executive Officer capacity for the Authority's operations. Implements policies established by the Board of Directors. Recommends improvements to management and control practices.

Significant Expenditure and Staffing Changes:
**General Expenses:** represents funding for WEF and MNGWPD funding that was divided between Water Production, Water Reclamation and Stormwater.

**Intrafund Transfers Out:** represents funds being transferred to the Renewal and Extension Fund for HQ restroom renovations.

After meeting all budgetary needs, we are able to place $2,080,318 into the Special Purchases category as a contingency fund to be used at the General Manager's discretion based upon Board approved policies.

Board Members - Operating Budget

**Department**: Executive  
**Business Unit**: (105) Board Members

### Major Business Unit Functions:
Develops policies that effectively provide and manage water, sewerage and stormwater services that protect the health, safety and welfare of CCWA’s customers. Comply with the mandates of local, state and federal legislation or statutes which may require the Authority to provide certain services, or to provide enforcement or regulation of services provided for the benefit of the Authority’s customers.

### Significant Expenditure and Staffing Changes:
No significant changes from previous fiscal year.

Information Technology - Operating Budget

**Department**: Executive  **Business Unit**: (106) Information Technology

**Major Business Unit Functions:**
Provides technology support and application support for the various functions and activities of the Authority. Evaluate existing and changing technologies to determine if and how they can be leveraged to support and enhance the business strategies of the Authority. Provides technical and operational support for the telephone system.

**Significant Expenditure and Staffing Changes:**

- **Personal Services**: increase represents funding for the reclass of the Communications Administrator from a paygrade 11 to paygrade 12.
- **Outside Services**: represents funding for infrastructure monitoring, JDE monitoring and support of additional applications.
- **General Expenses**: increase represents additional funding for new software that came onboard during the last fiscal year.
- **Intrafund Transfers Out**: represents funds being transferred to the Renewal and Extension Fund for infrastructure improvements, audio attendant gateway, help desk renovations, and voice environment upgrades.
- **Capital Expenditures**: represents funding for server improvements, additional production and backup storage, network equipment refresh, Windows and Vmware, additional Business Object license, Cloud Computing, Voice Equipment upgrades (phones) and Application Xtender upgrade.

Finance – Levels of Service

The Finance Department has three KPI metrics which are associated with the Authority’s “Optimize Operations” and “Ensure Financial Viability” goals and strategies 13, 17, and 18 to “Maintain a reasonable cost of service using the County’s median household income (MHI),” “Develop an annual budget that can be sustained,” and “Provide financing for the Authority’s investment in its capital projects.” The department met all three of its KPI metrics for the previous three fiscal years.

</table>
**Major Business Unit Functions:**
Oversees the finances of the Authority. Maintains the accounting records and prepares financial statements. Assists with the preparation and monitoring of the operating and capital budgets. Performs accounts payable function and prepares checks to satisfy outstanding obligations.

**Significant Expenditure and Staffing Changes:**
- **Personal Services:** increase represents a shadow position for the Budget Officer.
- **Interest:** increase is due to new GEFA loan for Outfall Construction.
- **Capital Financing:** increase is due to the amortization schedule of GEFA loans which results in a higher principal payment.
- **Intrafund Transfers Out:** represents Debt Service payments.

Customer Accounts Services – Levels of Service

The Customer Accounts Department has ten KPI metrics which are associated with the Authority’s “Exceed Customer Expectations, “Ensure Financial Viability”, and “Stakeholder Support” goals and strategies 4, 19, and 23 to “Improve CCWA customer experience”, “Maximize revenue collection vs. bad debt write-offs”, and “Environmental Stewardship and Sustainability”. The department’s performance on these metrics is captured in the table that follows.

**BUSINESS UNIT 131: METER SERVICES**

**Department:** Executive  
**Business Unit:** (131) Meter Services

**Major Business Unit Functions:**  
This business unit is responsible for reading all the Authority's 85,423 meters each month. Currently these meters are being read electronically using a drive-by radio reading system. Meter Services responsibilities include disconnecting services for accounts in a past due status, reconnecting services after payments are collected, investigating high bill customer concerns and meeting with the customer when necessary. Other responsibilities include updating and maintaining the electronic register on each meter. Meter Services coordinates heavily with the Customer Accounting and Customer Service Sections.

**Significant Expenditure and Staffing Changes:**  
Operating Materials and Supplies: represents funding for backflow cartridge replacements.  
Capital Expenditures: represents the scheduled replacement of two pick up trucks.  
Intrafund Transfers Out: represents funds being transferred to the Renewal and Extension Fund for 15 Fire Hydrant meters.

### Major Business Unit Functions:
Customer Accounting is responsible for preparation and delivery of all water, sewer and stormwater bills each month. Other responsibilities include preparing and posting adjustments to accounts, processing and posting electronic payments, monitoring of controls for the transfer of balances to the general ledger and maintenance of the customer deposit file.

### Significant Expenditure and Staffing Changes:
- **Outside Services**: Increase represents a 5% increase on postage along with an increase for NCOA.
- **Capital Expenditures**: Represents funding for the addition of a wall in the mail equipment room and cash counting area.

Major Business Unit Functions:
This business unit is responsible for creating a positive customer experience for CCWA customers. Sections in this business unit include payment locations such as Headquarters and Forest Park, Call Center and Collections. Services include receipt of payments, applications for new meters, setting up new service or ending service, addressing customer questions and concerns and collection of past due balances.

Significant Expenditure and Staffing Changes:
Administrative Supplies: increase represents funding for call center cubical rework and stand up desks for CSR's.

Clayton County Water Authority

“Providing Quality Water and Quality Services to Our Community”
The function of the Water Production Department is to produce potable water, which is then directed into the distribution system and sold to the Authority’s customers. The activity of producing drinking water is highly regulated and specific operating standards are promulgated by federal and state regulatory agencies that have oversight of the production of safe drinking water. The Water Production Department is also responsible for operating and maintaining the various recreation facilities.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over operations. The Water Production Manager is responsible for the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs, production plants, facilities, or areas of responsibility. The budget units that have been identified for this department are listed in a tabular format below.

- **301** - Water Production Manager
- **305** - Production O&M Support
- **310** - W. J. Hooper Water Plant
- **311** - Morrow Pumping Station
- **312** - Noah’s Ark Pumping Station
- **314** - Elevated Tanks
- **315** - J. W. Smith Water Plant
- **316** - Blalock Jr. Reservoir and Dam
- **317** - Jonesboro Pumping Station
- **318** - Forest Park & Cajun Queen Pumping Stations
- **319** - Shoal Creek Reservoir
- **320** - Terry R. Hicks Water Production Complex
- **325** - Well Program
- **330** - Water Quality Laboratory
- **340** - Smith CUB & Recreation Park
- **350** - Shamrock Recreation
- **351** - Shamrock Community Use Building
- **352** - Wetland Center
- **399** - Water Conservation

![Diagram of Water Production Division Budget Unit 300]

This diagram illustrates the organizational structure of the Water Production Division, including the different budget units and their associated FTEs (Full-Time Equivalents). Each budget unit is represented by a distinct color and shape, indicating its specific function and responsibility within the department.

Water Production Division – Levels of Service

The Water Production Division has nine KPI metrics that are associated with the Authority’s “Superior Product Quality,” “Exceed Customer Expectations,” “Provide Employee Development,” “Optimize Operations,” “Infrastructure Sustainability,” and “Stakeholder Support” goals and strategies 1, 5, 8, 13, 14, 21, and 23. The department’s performance on these metrics is captured in the table that follows.

</table>
**Overview of Department Responsibilities**

The primary responsibility of the Water Production Department is the production of potable water. This is accomplished primarily through the collection of raw surface water in reservoirs and then treating the stored water with chemicals and ultraviolet lights to ensure that it is fit for human consumption. The Department’s responsibilities also include facilitating the passive recreation activities (e.g., fishing, community use buildings) that are permitted on the property adjacent to the reservoirs. The activities are performed in accordance with the rules and regulations which govern the production of safe drinking water. Tasks are generally undertaken based on the priorities established by the General Manager.

Program Management and Engineering Division - Business Unit Group 500

Clayton County Water Authority

“Providing Quality Water and Quality Services to Our Community”
The Program Management and Engineering Department serves as the Authority’s planning, programming, monitoring, and review function for its plants, facilities, and distribution and collection systems. It is responsible for implementation of the Capital Improvement Master Plan, engineering and surveying, mapping the water and sewer system, and inspection of additions to the water and sewer systems. Tasks are performed in conformity with federal, state, and local laws and authority laws, regulations, and policies.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over support services. The Program Management and Engineering Manager is responsible for the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs, project funding sources, or functional areas of responsibility. The budget units that have been identified for this department are listed in a tabular format below.

- **501** - Program Management and Engineering Department Manager
- **507** - Construction Services
- **530** - Engineering
- **535** - Geographic Information Systems

Program Management and Engineering Division – Levels of Service

The Program Management and Engineering Division has three KPI metrics that are associated with the Authority’s “Superior Product Quality,” “Ensure Financial Viability,” and “Infrastructure Sustainability” goals and strategies 1, 17, and 22 to “To meet all applicable regulatory requirements,” “Have 100% of the Strategic Master Plan projects funded for the appropriate fiscal year according to plan,” and “Provide adequate treatment capacity.” The department’s performance on these metrics is captured in the table that follows.

Program Management and Engineering Division - Consolidated Operating Budget

Department: Program Management and Engineering  Business Unit: Department 500 - Consolidated

Overview of Department Responsibilities

The primary responsibilities of the Program Management and Engineering Department include implementation of the Master Plan, engineering design & construction support and surveying, mapping of the water and sewer system, oversight of the Geographic Information System (GIS) and inspection of additions to the water distribution, sewer and stormwater infrastructure systems. The activities are performed in accordance with federal and state laws, and with rules and regulations promulgated to cover water production and wastewater treatment. Tasks are generally undertaken based on the priorities established by the General Manager.

**Business Unit 501: Program Management and Engineering Manager**

**Department:** Program Management and Engineering  
**Business Unit:** (501) Program Management and Engineering Department Manager

**Major Business Unit Functions:**
Directs, manages and controls the efforts of the Program Management and Engineering Department. Manages the Authority's Master Planning process including forecasting future capacity needs, accommodating regulatory changes and improving operational efficiency. Manages engineering consulting services and new major construction projects.

**Significant Expenditure and Staffing Changes:**
- **Outside Services:** reflects funding for On-Call Engineering Services, Unidirectional Flushing Program along with Collection System Program Advisement.
- **Intrafund Transfers Out:** represents funds being transferred to the Renewal and Extension Fund for Distribution System Modeling follow up along with the 2020 Strategic Master Plan.

### Major Business Unit Functions:
Provides engineering services for construction of water and sewer lines. Reviews and approves proposed additions to the Authority’s water and sewer system. Assists customers with sewer and water service locations, tap-on fees and meter quotes.

### Significant Expenditure and Staffing Changes:
- **Personal Services**: represents funding for a new College Intern.
- **Outside Services**: represents funding for the annual SSES (Sewer System Evaluation Survey) Program along with consulting services for Plan Review Tech training.

BUSINESS UNIT 535: GEOGRAPHIC INFORMATION SERVICES (GIS)

Department: Program Management and Engineering  Business Unit: (535) Geographic Information Systems

Major Business Unit Functions:
Maintains geodatabase for water, sewer and storm piping systems. Manages the development and implementation of work order and inspection tools to support field and management operations. Provides survey information for engineering design projects. Provides data and mapping for asset management and planning purposes. Responsible for acquisition of easements for water and sewer construction projects.

Significant Expenditure and Staffing Changes:
Intrafund Transfers Out: represents funds being transferred to the Renewal and Extension Fund for CIS and JDE integration support.

The Distribution and Conveyance Department is charged with the critical task of ensuring the efficiency of the individual distribution and collection systems. It has the responsibilities of installing the Authority’s water lines, water meters, and maintaining both water and sewer lines. Work must be performed in compliance with standards established by the federal and state regulatory agencies as they pertain to water distribution and sewerage collection.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over operations. The Distribution and Conveyance Manager is responsible for the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs, types of services, or functional areas of responsibility. The budget units that have been identified for this department are listed in a tabular format below.

Distribution and Conveyance Division - Consolidated Operating Budget

**Department:** Distribution and Conveyance  
**Business Unit:** Department 600 - Consolidated

**Overview of Department Responsibilities**
The primary responsibility of the Distribution and Conveyance (D&C) Department is ensuring the overall integrity of the water distribution and wastewater collection systems. The Department installs and maintains water lines and water meters. It also maintains the wastewater collection system. The activities are performed in accordance with federal and state laws which govern water distribution and wastewater collection systems. Tasks are generally undertaken based on the priorities established by the General Manager.

BUSINESS UNIT 610: METER INSTALLATION

**Department**: Distribution and Conveyance  
**Business Unit**: (610) Meter Installation

**Major Business Unit Functions:**
Oversees the installation of meters.

**Significant Expenditure and Staffing Changes:**
- **Operating Materials and Supplies**: decrease is due to more of the larger meters being set this upcoming years. These activities will take place in the R&E fund.
- **Outside Services**: decrease represents funding for meter and backflow settings along with building and repairing meter vaults, the larger meter setting are now being done in-house rather than by outside contractors.

Clayton County Water Authority

“Providing Quality Water and Quality Services to Our Community”
The Water Reclamation Department is responsible for treating the wastewater generated by the Authority’s customers. To achieve its task of reclaiming water so that it is environmentally safe, it operates three wastewater plants, one bio-solid plant, and a central laboratory. The activity of treating wastewater is highly regulated and specific operating standards are promulgated by federal and state regulatory agencies that have oversight of wastewater treatment.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over operations. The Water Reclamation Manager is responsible for the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs, reclamation facilities, activities, or areas of responsibility. The budget units that have been identified for this department are listed below.

701 - Water Reclamation Manager
720 - W. B. Casey Sr. Water Resource Recovery Facility
721 - Northeast Water Reclamation Plant
722 - Northeast Solids Handling
724 - Shoal Creek Water Reclamation Plant
727 - Shoal Creek Solids Handling
729 - R. L. Jackson Transfer Pump Station

730 - Laboratory and Environmental Compliance
731 - Sludge Pelletizing
732 - Influent Pump Station
740 - Natural Treatment Operations and Maintenance
741 - Panhandle Road Wetlands
742 - Huie Wetlands

### Water Reclamation Department Total

**Water Reclamation Department Total**: 51.23, 53.23, 53.23
Overview of Department Responsibilities
The primary responsibility of the Water Reclamation Department is the operation of three water reclamation facilities. These operations include treating the wastewater, educating the public about sanitary sewers, monitoring the treatment results and effecting the environmentally safe disposition of the residuals produced by the process. The activities are performed in accordance with federal and state laws, and with rules and regulations promulgated to cover wastewater treatment. Tasks are generally undertaken based on the priorities established by the General Manager.

Clayton County Water Authority

“Providing Quality Water and Quality Services to Our Community”
GENERAL SERVICES DEPARTMENT
BUDGET UNIT 900

The General Services Department serves in the capacity of an internal services provider for other departments. It has the responsibility of repairing and maintaining the Authority’s fleet, mechanical, electrical, and structural equipment. It is responsible for maintaining the following buildings: the headquarters complex, the plants, grounds of the plants, recreation sites, and sewer lift and metering stations. The General Services Department also performs small renovation and construction projects. Tasks are performed in conformity with federal, state, and local laws and authority laws, regulations, and policies.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over support services. The General Service Manager is responsible for directing the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs, types of service being provided, or areas of responsibility. The budget units that have been identified for this department are listed below.

- 901-General Services Manager
- 925-Sewer Lift Stations
- 930-Garage
- 940-Warehouse
- 950-Equipment Maintenance
- 960-Grounds/Right-of-Way Maintenance
- 970-Building Maintenance and Projects
The General Services Division has a new director that changed the Levels of Service metrics for his group last year. These four KPI metrics are better aligned with the desired performance for the division. These four indicators are associated with the Authority’s “Optimize Operations” and “Infrastructure Sustainability” goals and strategies 15 and 20 to “Minimize fleet downtime” and “Implement sound asset management practices”. The department’s performance on these metrics is captured in the table that follows:

### Service Level Goal

## Overview of Department Responsibilities

The General Services Department represents the internal service functions for the Authority. Its responsibilities include purchasing and warehousing inventory items needed by the operating departments; repairing and maintaining vehicles and heavy-duty equipment; maintaining grounds and clearing right-of-ways; performing small building and construction projects; repairing and maintaining plants, pumping stations and lift stations operating equipment and electrical and communication systems. General Services is also responsible for bidding and contracting for all products and services for CCWA. Tasks are generally undertaken based on priorities established by the General Manager.

STORMWATER FUND
BUDGET UNIT 200

The primary responsibility of the Stormwater Utility Department is the management of Stormwater related activities throughout Clayton County as regulated through the Clean Water Act set in place in 1977. This act includes, but is not limited to, requirements to set water quality standards for all contaminants in surface water. The Stormwater Utility will be working closely with County government and local municipalities to protect local streams, rivers, and lakes along with the maintenance of and planning for local infrastructure needs.

Responsibilities are accomplished per the general direction of the General Manager and the Assistant General Manager over operations. The Stormwater Manager is responsible for directing the day-to-day operations of the department.

To better manage operating expenses, the department is broken down into specific programs from management to inspection. The budget units that have been identified for this department are listed below.

201 Stormwater Management
205 Stormwater Engineering
210 Stormwater Maintenance

Stormwater Fund – Levels of Service

The Stormwater Fund has six KPI metrics that are associated with the Authority’s “Superior Product Quality,” “Exceed Customer Expectations,” “Provide Employee Development,” and “Optimize Operations” goals and strategies 3, 4, 8, and 13. The department’s performance on these metrics is captured in the table that follows.

<table>

Overview of Stormwater Utility Responsibilities
The primary responsibility of the Stormwater Utility Section is the management of Stormwater related activities throughout Clayton County. These activities include, but are not limited to: 1) helping Clayton County government, local municipalities, and the Authority comply with the regulations in the Clean Water Act and Safe Drinking Water Act; 2) helping to maintain and improve stormwater infrastructure in Clayton County, protect property values, minimize flooding and maintain facilities; 3) safeguarding water quality; 4) protecting local streams, rivers, and lakes; 5) supporting sound, long-term planning of local infrastructure needs and capital improvement activities; and 6) providing a fair and equitable means for distributing the financial responsibility of proper stormwater management in the County.

Functional Breakdown of Business Units for Budgeting Purposes
- Stormwater Management
- Stormwater Engineering
- Stormwater Maintenance
BUSINESS UNIT 201: STORMWATER MANAGEMENT

**Department :** Stormwater Utility

**Business Unit :** (201) Stormwater Management

**Major Business Unit Functions:**
Directs, manages and controls the efforts of the Stormwater Utility Section. Manages efforts with consultants and contractors for outside service projects.

**Significant Expenditure and Staffing Changes:**

**Personal Services:** increase represents the reclass of the Stormwater Program Manager from a paygrade 15 to a paygrade 16.

**Interfund Transfers Out:** represents a monthly payment to the Water and Sewer Utility Revenue Fund for the Stormwater Utility's pro rata portion of certain administrative expenses.

**Intrafund Transfers Out:** represents funds being transferred to Stormwater Construction to change Building A from septic to sanitary sewer.

BUSINESS UNIT 210: STORMWATER MAINTENANCE

Department: Stormwater Utility
Business Unit: (210) Stormwater Maintenance

**Major Business Unit Functions:**
Maintenance and repair of stormwater infrastructure throughout the County. Works on smaller scale Capital Improvement Projects (CIP’s).

**Significant Expenditure and Staffing Changes:**
- **Personal Services:** increase represents funding for a new SW Maintenance & Installation Foreman.
- **Intrafund Transfers Out:** represents funding for CIPP (Cured in Place Pipe) and R/R (Removal and Replacement of Pipe).
- **Capital Expenditures:** represents funding for the replacement of a Gradall, Flat Bed Dump, (2) 20 ton Trailers, Easements and a new Pickup Truck for the new employee added.

</table>
The primary purpose of the Capital Budget section is to provide the reader with additional information about the Authority’s plan for acquiring or constructing the capital assets that are required to provide water, sewer and stormwater services to our customers. The terms “capital assets” or “capital outlay” refer to the plant, piping, property, equipment and infrastructure that are used by CCWA in its day-to-day operations. As far as the specific information provided in this section, the discussion of capital outlay is presented in three segments: 1) Work Priorities, 2) Capital Expenditures, and 3) Capital Projects.

In this section, the reader will find an explanation of how the Authority goes about programming or planning for the acquisition of its capital assets. Additional narrative is included to explain the rationale behind the various funding methods that are used. Cost information is also provided as to the anticipated impact of these capital outlay disbursements on future operating expenses.

CCWA uses two primary categories for its Capital Budget; Capital Expenditures for equipment and vehicles purchases and Capital Projects. CCWA differentiates Capital Projects from Capital Equipment by defining a Capital Project as one that requires multiple resources to complete. These resources could include any combination of inside labor, outside labor, and various materials or products that require assembly or construction to become a long-term asset. The equipment and rolling stock being purchased in FY 2018 – 2019 for both the Water and Sewer and Stormwater Funds are detailed first. Next, the Authority’s Capital Improvement Plan (CIP) and Projects are presented by historical, current and anticipated future spending requirements.

Within the Water and Sewer Fund, the is a Renewal and Extension Fund (RE) that acts as a capital projects fund. After approval from the Board of Directors, the Capital Budget funding is moved from the operating fund into the Renewal and Extension Fund until the projects are completed. The completed assets are then transferred back into the responsible business unit of the Water and Sewer Fund to be maintained.
Capital Budget Overview

Long-term Capital Planning is a dynamic process and is part of CCWA’s overall strategic plan. Because strategic planning is a process and its activities are continually changing, long-term capital planning must be subject to periodic review and periodic revisions.

The capital planning process involves identifying current and future needs and prioritizing these needs based on certain operating assumptions. The primary objective of planning efforts for CCWA is to create a stable, long-range financial plan and support an orderly, efficient program of improvement, expansion, and replacement. It is the goal of the capital plan to develop an independent, self-sustaining capital improvement program using a mixture of financial resources and timing the project and its cash flow to meet those available resources.

CCWA follows its Strategic Master Plan (SMP) that outlines future water, wastewater, stormwater and administrative improvement projects for the next ten years based on projected future demands. This SMP is used by CCWA staff as a guide to develop the long-range financial plan of the Authority and serves as a living document that can be updated as the Authority grows and as the character of future development becomes more certain.

CCWA conducted its original SMP study in 2010. The study combined various planning efforts into one document that addresses the needs within the vast Authority’s operations, water, wastewater, and stormwater. An update to the SMP was published during 2015. The Authority prepared a separate Information Technology Master Plan (ITMP) in 2012 and then combined it with the SMP as part of the 2015 update. The FY 2018 – 2019 budget allocates $750K for the 2020 Strategic Master Plan. Additional information about planning can be found in the section titled PLANNING AND DIRECTION.

To meet pay-as-you-go objectives, all funding required by a project must be available before it is taken to the Board of Directors for approval. Along with financial resources, staff resources are also considered as part of the project planning process. To meet funding requirements, money is accumulated in the Renewal and Extension Fund where it is earmarked for a particular job. Large projects are planned in phases allowing the required funding to be accumulated and work accomplished in stages. Each phase has a distinct, operational benefit when completed and doesn’t rely on later phases to perform.

The housing crisis in 2008 prompted a more conservative budgeting approach. To assure basic operations could be maintained, projected revenues are based on reliable, predictable operating revenues. Economic development and the timing of revenue based on that development cannot be easily predicted. Revenues generated from economic development include installation (tapping) fees and impact fees which totaled $52.3M for fiscal year ended 2017 and are estimated to be about $3M for fiscal year ended 2018. The timber from properties around CCWA reservoirs is harvested and sold every few years when market conditions and tree maturity is right. Revenue generated from this activity can range from $1M to $2M but is unpredictable. For the fiscal year ended 2018, the sale of timber is estimated at $1.5M while no revenue was generated from this activity in 2017.

Due to the conservative budgeting approach and the need to accumulate all funds required for a project prior to the beginning of a project, there has been a cash surplus at the end of the previous four years. At the time the budget is approved for the new fiscal year, the amount of that surplus is forecasted and allocated by the Board of Directors to meet future capital project needs and is transferred to one of the Renewal and Extension Fund construction lines. Cash on Hand is maintained at 4.5 months.

Budget surplus for the fiscal years ended 2017 and 2018 were $19.3M and $17.8M, respectively.
Capital Improvement Program - Long-Term Goals and Objectives

The following are CCWA’s Capital Improvement Program Goals and Objectives for the fiscal year 2018 - 2019:

- Within the resources available each fiscal year, to provide safe and reliable services to all customers, maintain and safeguard the Authority’s capital assets and infrastructure through implementation of various replacement and betterment programs based on the Strategic Master Plan [SMP].
- Maintain a consistent allocation of resources for programs to carry out the Authority’s mission to its customers.
- Complete expansion projects to meet current and future water and recycled customer demands.
- Continue efforts to develop alternative water supplies, including recycled water, through cooperative agreements with various agencies to provide safe and reliable water to each customer in a cost-effective manner.
- Continue to operate the water and wastewater facilities in a cost-effective manner through implementation of various innovative and operational enhancements to the system when needed.
- Continue improving services to all customers using advanced technology in a cost-effective manner.

Summary of Capital Improvement Program Expenditures

Capital Purchases and Projects

The Authority’s capital spending includes capital equipment purchases and capital projects. The total capital expenditures for Fiscal Year 2018-2019 are budgeted at $14.0 million, consisting of $3.4 million in capital equipment purchases and $10.6 million in capital projects.

Items in the capital budget are those that are non-recurring, cost $5,000 or more and have a useful life of greater than one year or extend the productive life of an existing asset. These are assets that are used in the operations of a business over a multiple year period and are sometimes referred to as capital outlay.

CCWA uses the term capital expenditure as the purchase of equipment and vehicles. The current year budgeted request is $3.4M, $1.2M higher than the previous year. Summaries of capital item purchases for Fiscal Year 2018-2019 are listed on the following pages.

CCWA differentiates Capital Projects from Capital Equipment by defining a Capital Project as one that requires multiple resources to complete. These resources could include any combination of inside labor, outside labor, and various materials or products that require assembly or construction to become a long-term asset. Capital Projects are budgeted at $10.6M compared to the previous budget year amount of $16.2M. Amounts budgeted in this category exclude inside labor costs, which are included in the operating budget in the Personal Services.

In addition to other Authority initiatives which are funded from the operating budget, capital projects that are identified in CCWA’s Capital Improvement Program are listed as Work Priorities on the following page and are prioritized based on the criteria in the adjoining table.

</tbody>
</table>

Replacement recommendations are based on (1) model year, (2) mileage, (3) maintenance as a % of purchased price, input from Fleet Maintenance Supervisor. The following point system has been devised to determine factors in the three categories: After completing the inventory assessment, each vehicle’s category is reviewed (model year, mileage, maintenance percentage to purchased price), and assigned the associated rating. When a combination of two or three categories are on the high end of the rating point system, justification to replace is based on cost
avoidance of major repairs and loss of usage to end users. In addition, additional information such as condition of the vehicle and future required usage is considered.

Once justification to replace is determined, the recommended replacement is made, and estimated replacement cost is determined using Georgia State Wide Contract. Upon board approval, the Approved Fiscal Year Budget books are produced with the approved purchases. Approved vehicles are captured from the budget book and compiled. The General Service Fleet Maintenance Supervisor and Fleet Administrator compiles a listing of availability from the Georgia State Wide Contract. Specifications for vehicles that are not available on the Georgia State Wide Contract are advertised through CCWA's bidding process.

CCWA is currently developing a Strategic Asset Management Plan (SAMP) that will develop criteria for all its capital assets.

Capital Improvement Program (CIP) – Capital Projects

Projects listed in the CIP budget are reviewed annually by management and staff to allow the program to be more responsive to changing priorities, particularly with respect to changes in demand projections and operational enhancements. The changes sometimes result in the addition of projects and the acceleration or delay of project schedules. Additionally, quarterly review of all active projects will provide on-going updates on project cost estimates as detailed design information becomes available. Construction project status is monitored and reviewed monthly with a construction report.

Historical Capital Project Spending

Changes in Capital Project Activity

While the number of capital projects opened have doubled and average spending has tripled, staffing has increased by 19 employees or 5 percent. The number of full-time employees (FTEs) in FY 2014-2015 was 377 compared with 396 in FY 2018-2019.

The description and purpose of the primary Renewal and Extension construction lines follow under the heading *Capital Project Funding FY 2018 – 2019 – By Main Construction Line*. Renewal and Extension construction lines specific to Pipeline Programs is located under the heading *Summary of Distribution and Conveyance Annual Capital Spending*. 

<sup>1</sup> Includes force main replacements.

During construction, all capital projects are reported in the Renewal and Extension Fund (RE Fund) under main lines of construction. A monthly construction report shows the detailed spending and status of each project during construction. A graph showing the monthly capital spending for FY 2017 – 2018 is shown below.

The description and purpose of the primary Renewal and Extension construction lines follow under the heading Capital Project Funding FY 2018 – 2019 – By Main Construction Line.
Projected Capital Project Spending

Capital Project Listing with Annual Cash Flow Requirements - FY 2018 - 2019 through FY 2024 - 2025

The tables on the following pages list, by department, the capital projects that comprise the next 5 years of eight remaining years of CCWA’s 10-Year Master Plan and the corresponding cash flows required to fund those projects. A total of roughly $367 million will be required over the life of the Master Plan to complete all planned projects. Of that total, Water and Sewer Fund projects total $326 million and Stormwater Fund projects total $41 million. A portion of these projects is included in the current adopted budget for FY 2018 – 2019 and the impact of each of those projects on the operating budget is detailed, by individual project, in the sections RENEWAL AND EXTENSION FUNDED PROJECTS and STORMWATER FUNDED PROJECTS. Summaries for the operational impact of these projects are under the headings Impact Summary of Capital Projects on Operating Budget - Renewal and Extension Fund and Impact Summary of Capital Projects on Operating Budget - Stormwater Fund in the upcoming pages of this document. Capital projects funded by the FY 2018 – 2019 budget total $10.4 million with an additional $17.8 million funded from the FY 2017 – 2018 budget surplus approved by the Board of Directors along with the FY 2018 – 2019 budget.

Current Capital Project Spending
Capital Project Funding FY 2018 - 2019 - By Main Construction Line; Renewal and Extension Fund

DISTRIBUTION AND CONVEYANCE PROGRAMS

**RE166- COLLECTION SYSTEM - INFILTRATION AND INFLOW (I/I) [SMP 613, 614, 618]**

This construction line contains projects related to major sewer line replacements, repairs, or lining (Cured-in-place pipe -CIPP). This construction line focuses on sewer pipe with a diameter of 15” or smaller. Many of these projects are the result of evaluations for Inflow and Infiltration performed on the wastewater collection system. Outside contractors perform CIPP lining work and open cut work to replace damaged pipe and reduce infiltration. CCWA crews perform sewer line point repairs in these basins to address sewer pipe components that are in danger of collapse or significant infiltration. Projects under this construction line are driven by the SSES program which utilizes infiltration and inflow (I/I) studies, age of pipe and staff knowledge. Since FY 2015-2016, $4.3M has been spent and 34 projects have been completed replacing 8 miles of pipe infrastructure.

**Basin Level Sewer Rehabilitation** projects [SMP 614] are under this construction line with $2M budgeted annually for this program. At that funding level, approximately 2.5 miles of pipeline can be renewed each year. The Sewer System Evaluation Surveys (SSES) condition assessments [SMP 613] that are performed on our system prioritize the projects that are worked on. SSES assessment work has an annual operating budget of $1.5M. Additional funding of $4.8M from FY 2017-2018 budget surplus was approved by the Board of Directors for Jesters Creek Phase 4. This project will be a continuation of Jesters Creek Phases 1, 2, and 3 and replace 7,700 feet of sewer line. The FY 2017-2018 budget surplus will also fund $3.8M the Rum Creek Outfall project. This is replace 6,100 feet of gravity sewer from the Rum Creek Lift Station and connect to the Flint River Outfall Phase 1A. The condition of this pipe may allow for CIPP instead of complete replacement.

8 miles replaced

**RE174 - GALVANIZED WATERMAIN REPLACEMENTS [SMP 601]**

This program focuses on the systematic replacement of 2-inch galvanized water mains with 8-inch water lines to improve water quality and fire protection. The affected areas of water distribution system targeted for water main replacements are the areas with most of water leakage and water quality complaints as well as fire hydrant spacing.
The planning level estimated cost of this program is $35M with an estimated duration of 28 years. The annual budget goal for **Galvanized Water Main Replacement** is $1.25M, which will keep one crew busy 52 weeks a year and replaces about 2.4 miles of pipe. A typical replacement job takes about one week to complete. The FY 2018-2019 capital budget allocates $1.75M with another $500K approved by the Board of Directors from FY 2017-2018 surplus. If the budget for this program were increased to $2.25M, all the galvanized water main could be replaced in 11 years.

**RE180 – WATERMAIN RELOCATIONS**
This construction line funds the relocation of water lines due to the widening of roads by the both state and federal departments of transportation (DOT). Funding varies from year to year based on state and federal need. The FY 2018 – 2019 budget has $769K for expected DOT projects within the fiscal year for two projects, *Department of Transportation (DOT) – Stagecoach and Steel Roads* and *Department of Transportation (DOT) – Tara Boulevard*.

**RE225 – WATER LINE EXTENSIONS**
This construction line is used for expansion of water lines required by new residential and commercial developments. There are no annual targets and budgeting in this line follows County permits and development needs.

**RE226 – SEWER LINE EXTENSIONS AND STUB-OUTS**
Projects for the expansion of sewer lines required by new residential and commercial development are placed under this construction line. There are no annual targets and budgeting in this line follows County permits and development needs. The current budget includes funding of $10K for this sewer initiative.

**RE227 – METER SETTINGS**
This construction line contains projects for the placement of large meters and fire meters required by new commercial and institutional development. There are no annual targets and budgeting in this line follows County permits and development needs. The FY 2018 – 2019 budget includes $20K for Meter Settings.

**RE228 – SEWER FORCE MAIN REPLACEMENTS [SMP 639]**
The annual funding target for this program is $1.2M beginning in the next budget year. The FY 2017 - 2018 budget contained $250K to develop a formal Pressure Sewer Condition Assessment program for our 48 miles of sewer force...
mains throughout the conveyance system. The resulting projects from this assessment program will be funded under this construction line.

**RE232 – LARGE METER REPLACEMENTS**

This construction line contains projects for the replacement of large meters for commercial and industrial. There are no annual targets and budgeting in this line follows need. The FY 2018 – 2019 Capital Budget includes funding of $500K for *Large Meter Replacements* and an additional $30K for *Fire Hydrant Meters*. 
A primary focus for the Authority over the next several years will be on its conveyance system. The map below shows the area of sewer pipe that will be replaced as part of the large Interceptor renewal initiative. The estimated cost of all 10 projects affiliated with this outfall replacement is $57.9 million. Started in FY 2015-2016, construction will span several years. Phases 1a and 1b are completed and a $25 million Clean Water SRF loan approved by the Georgia Environmental Finance Authority in January 2017 will be used to assist with the funding of projects 3 through 6 of the 10-project rehabilitation program. This year’s budget includes $300K for the design of Project 9: **Jesters Creek Outfall East Replacement**.

Completed:

Underway or Planned:
This Renewal and Extension Fund construction line focuses on improvements at CCWA’s largest and newest water reclamation facility, W.B. Casey. Large projects underway are the preliminary treatment unit (PTU) improvements, the addition of a fourth-secondary clarifier, rehabilitation of the three existing clarifiers, and a new polishing facility. Enhancements to the PTU with a new screen structure and rotary drum screen will reduce maintenance costs by protecting downstream treatment equipment, help mitigate peak flow situations, provide better odor control and improve the byproduct pellets sold to a fertilizer company. The additional clarifier and the rehabilitation of the existing clarifiers will provide additional needed treatment capacity and meet increasingly stringent effluent regulatory
requirements. The FY 2018 – 2019 Capital Budget includes four smaller projects totaling $271K that will be started under this line; *Casey Capacity Evaluation, Three Secondary Clarifier Baffles, Scum Trough Assembly, Primary Clarifier Solids Meter,* and a *Polymer Tank* for Pelletizing Operations.

**RE204 – GENERAL SERVICES MAINTENANCE BUILDING [SMP 901]**

The General Services Maintenance Building will co-locate and improve working conditions for 30 staff members currently located in three separate facilities spread throughout the county. Each of the separate facilities have significant issues related to its structural condition, functionality and environmental conditions, and lack of adequate work and storage space for needed parts and flammable items. Co-locating these facilities in an energy efficient, secure location will improve operational efficiencies, reduce utility costs and increase productivity of personnel. Construction should be completed early fall of 2018.

**RE219 – LIFT STATION REHABILITATION**

This construction line is used to fund capital improvements to the 41 lift stations that are part of the sewer conveyance infrastructure throughout the County. A comprehensive Lift Station Assessment was funded in the FY 2017 – 2018 budget. The first phases of this project will be the development of a master list of stations and any known operational or capital issues. Based on this initial list, follow-up condition assessment activities will be conducted in future years and the resulting construction activities will be performed under [SMP 903] - Lift Station Rehabilitation. A current project under construction in this line is the Rum Creek Lift Station upgrade with a cost of $2.1M.

**RE229 – WATER PRODUCTION FACILITIES IMPROVEMENTS**

This main construction line contains capital projects for the work done at one of three water production facilities or for improving water quality in the reservoirs that supply these water plants. The FY 2018 – 2019 Capital Budget will
fund two smaller projects totaling $140K: rebuilding two pumps and flow meters, controllers and software at the Hicks Water Production Plant.

Other major projects that were funded by FY 2017-2018 budget surplus funds approved by the Board of Directors under this construction line was the Hooper Lower Pond Solids Handling initiative that will replace the current sludge removal system at the Hooper Plant. This $5.0M project will provide a more robust technology that is able to remove consistently the sludge that accumulates in the holding pond. This chain and flight system will alleviate the need for an outside contractor to remove the sludge. This has become a quarterly expense of approximately $20,000 and will save the Authority almost $80,000 annually. Effectively removing sludge helps the Authority comply with the requirements of our National Pollutant Discharge Elimination System (NPDES) permit by discharging “cleaner water” back into the Hooper Reservoir. The NPDES permit program, created in 1972 by the Clean Water Act, addresses water pollution by regulating point sources that discharge pollutants to waters in the US. This project was delayed from the FY 2017-2018 budget due to ‘Taste and Odor’ Issues experienced in the fall due to algae bloom. The second project funded by budgetary surplus of $1.75M is a generator [SMP 307] [WP 2016-10] to provide emergency back-up power in the event of an electrical outage.
UTILITY-WIDE PROJECTS

**RE146 – MISCELLANEOUS INHOUSE PROJECTS**
This Renewal and Extension line contains smaller capital projects that will be performed by CCWA staff that do not fit into other primary Renewal and Extension Fund construction lines. The FY 2018 – 2019 Budget has funding for $60K for the *Renovation of Restrooms* at the Headquarters building and $10K to *Update the Break Room* at the Hicks Water Treatment Plant.

**RE184 – STRATEGIC MASTER PLAN**
This Renewal and Extension line holds funding for consulting services for evaluations, assessments and studies that support the five-year updates to the Strategic Master Plan [SMP]. The last update to the SMP was 2015. The FY 2018 – 2019 Budget includes funding of $750K for the *2020 Strategic Master Plan Update*.

**RE205 – SCADA UPGRADES [SMP 906]**
This Renewal and Extension main line holds major SCADA (supervisory control and data acquisition) projects. SCADA is a software application program for used for process control and for gathering of data in real time from remote locations in order to control equipment and conditions. SCADA Systems consist of both hardware and software components. The hardware collects and feeds data into a computer with SCADA software installed. The data is then processed by the computer before presenting it. The function of SCADA is to record and log all events in a file that is stored in a hard disk or that is sent to a printer. If conditions become hazardous, SCADA can sound warning alarms.

SCADA systems are used in our water and wastewater treatment plants to track performance of treatment equipment and processes. The system directly interacts with devices such as sensors, valves, pump, motors while it monitors, gathers and processes data in real-time and is vital to our production and treatment of water and wastewater.

SCADA Upgrades planned under this construction line consists of six projects with the final two funded in the prior year budget:

1. SCADA Servers (*Completed April 2016*)
2. Bristol RTU Upgrades (*Completed March 2017*)
3. Mission Communication Upgrades (*Completed March 2017*)
4. Plant Ethernet Upgrades (*Estimated Completion September 2018*)
5. Facility Firewall and Wireless Access Points (*Estimated Completion December 2019*)
6. GE Mobile Products (*Estimated to start FY 2018-2019*)
**RE220 – CUSTOMER INFORMATION SYSTEM DEVELOPMENT**

This main construction line contains all projects and task orders relevant to the replacement and implementation of the Authority’s Customer Information System. The budget for this project is $4.5M. This major initiative is expected to be completed in the summer of 2019.

**RE222 – COMPANYWIDE SECURITY – [SMP 104]**

This construction line of the Renewal and Extension Fund holds projects undertaken as part of the Security Management System to provide physical security of the Authority’s properties. The objective of projects under this line is to improve organization security by integrating access controls and video (CCTV) management on one unified security platform.

The projects include hardware and software installation, access control, visitor management system and formalized security processes and procedures for the operation and maintenance of this new system.

This two-phase initiative has a total cost of $2.5M and was funded the previous two budgets. The first phase of the project was completed in March 2017 and the second phase of the project will be completed by December 2018.

**RE230 – INFORMATION TECHNOLOGY PROJECTS**

This construction line contains capital projects that improve the technology infrastructure of the Authority. Projects under this Renewal and Extension line include network upgrades and improvements and consist of both hardware and software enhancements. The largest initiative under this line is the JD Edwards ERP System upgrade with a cost of $2.5M. This project will occur during FY 2018-2019 and was funded in prior year budgets.

The 2018 – 2019 capital budget funds a total of $96K for the following projects: *Infrastructure Improvements, Auto Attendant Upgrade, Voice Environment Upgrade*, and *Help Desk Renovations.*
Capital Project Funding FY 2018 – 2019 – By Stormwater Construction Lines

The Stormwater Fund has two primary types of projects, Watershed Improvements and Capital infrastructure Improvements. The capital infrastructure projects are classified as either Open-Cut (Renewal and Replacement) or Cured-In-Place-Pipe (CIPP). These projects are similar to gravity sewer programs (RE 166) with open cut and cured-in-place methods. Projects are driven by complaints and permit required inspections. Since FY 2015-2016, $11.1 M has been spent and 109 projects completed.

The 10-year strategic master plan estimated the cost of capital infrastructure rehabilitation would be $35M. The annual budget target for stormwater pipe renewal is $3.5M, which would rehabilitate approximately two miles of stormwater pipe. The table that follows shows a summary of stormwater infrastructure projects by fiscal year.
**SW004 – STORMWATER CURED-IN-PLACE PIPE (CIPP) – [SMP 214]**

This construction line funds the Cured-In-Place-Pipe (CIPP) Stormwater program. CIPP is the most common trenchless technology used by CCWA for pipeline rehabilitation. A large liner is inserted inside a pipe and then applied to coat the inside of an existing stormwater pipe. The standard design provides a standalone, structurally complete replacement. The FY 2018 – 2019 budget will fund $1.5M of Stormwater Cured-In-Place Pipe improvements.

**SW005 – STORMWATER REMOVAL AND REPLACEMENT PIPE (R/R) – [SMP 214]**

This construction line funds the Stormwater Removal and Replacement (R/R) projects in the capital infrastructure improvement program. The FY 2018 – 2019 budget will fund $1,773,001 of R/R pipe replacement.
Photographs below show the “before and after” of a culvert renewal.

**SW006 – UPPER FLINT-LAKE MIRROR STORMWATER IMPROVEMENTS**

This construction line was set-up for the repair that will resolve flooding on Lake Mirror Place (at Cajun Queen Ground Storage Tank). This is the second phase of the Upper Flint River – Lake Mirror Stormwater Improvement project that was identified in the Upper Flint Watershed Management Plan in 2010. Phase 2 of this project consists of installing 1,300 feet of 60-inch reinforced concrete pipe and other drainage intake structures to capture and improve existing stormwater drainage. The first phase of this watershed project installed 700 feet of 60-inch reinforced concrete pipe and other intake structures to capture stormwater flow.

**SW008 – VETERAN’S PARKWAY PHASE 2**

This construction line holds the Veterans Parkway Stormwater Rehabilitation project that will replace and reroute dual runs of 48” Corrugated Metal Pipe, roughly 790’ each. The existing pipe route is not entirely within road right-of-way (ROW), therefore the lines will be combined and replaced with a single 72” Reinforced Concrete Pipe and rerouted to be within the ROW.
The photograph shows the challenge utility lines present when replacing pipe infrastructure.

## HQ Restroom Renovations – $60,000

### DESCRIPTION OF PROJECT
This project is to redesign and upgrade approximately four restrooms in the HQ Building. The restrooms selected are both the men and women's on the 2nd and 3rd floors. Our goal is to improve the function and appearance of the restrooms including handicap accessibility and water and energy use efficiencies.

### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

**Infrastructure Improvements - $25,000**

**DESCRIPTION OF PROJECT**

This project is for fiber infrastructure improvements or replacements at CCWA sites.

<table>
<thead>
<tr>
<th>Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Available</td>
</tr>
<tr>
<td>$0</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

The change to the annual operating budget for this project will be an increase of approximately $2,500 and are related to changes in utility charges and standard IT maintenance costs.
Auto Attendant Upgrade

**DESCRIPTION OF PROJECT**
Cisco Auto Attendant Upgrade software for the operator to be able to manage call flow, we are upgrading to the latest version, our current version is over three years old.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>

**DESCRIPTION OF PROJECT**

All application servers that use Cisco Voice over IP need to be upgraded to latest version. This is for hardware, software and outside services to assist with set-up.

**IMPACT ON OPERATING BUDGET**

The impact on the operating budget for this project is $7,600 and will consist of changes in annual maintenance fees which are estimated at 20 percent of the project cost.
Help Desk Renovations

**Department:** Executive  
**Fund:** R & E  
**Budget Unit:** Information Technology  
**Utility:** Water / Sewer

### Help Desk Renovations - $10,000

#### DESCRIPTION OF PROJECT
This is a small renovation project to create additional workspace in the Help Desk. This will allow the space to have additional room to configure computers and troubleshoot as needed.

#### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>
<th>Year</th>

</tbody>
</table>

#### IMPACT ON OPERATING BUDGET
This project is the reconfiguration of the current workspace and will have a neutral impact to the operating budget.
Fire Hydrant Meters (15)

<table>
<thead>
<tr>
<th>Department:</th>
<th>Executive</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fund:</td>
<td>R &amp; E</td>
</tr>
<tr>
<td>Budget Unit:</td>
<td>Meter Services</td>
</tr>
<tr>
<td>Utility:</td>
<td>Water / Sewer</td>
</tr>
</tbody>
</table>

Fire Hydrant Meters (15) - $30,000

DESCRIPTION OF PROJECT

Hydrant meters are leased by customers to allow access to water through a fire hydrant. The hydrant meter measures the usage for billing purposes. The use of hydrant meters has increased requiring 15 hydrant meters to be added to the CCWA current inventory of 88. If hydrant meters are not available, people will be tempted to use water from the hydrant without the usage being measured and revenue will be lost.

Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0</td>
<td>$30,000</td>
<td>($22,875)</td>
<td>($22,875)</td>
<td>($22,875)</td>
<td>($22,875)</td>
</tr>
</tbody>
</table>

IMPACT ON OPERATING BUDGET

The average annual revenue per fire hydrant is $1,600. Hydrant meters are serviced each time they are returned and average annual maintenance per meter is $75.

Applying that amount to the additional 15 meters would result in an annual increase in revenue of $24,000 and an annual increase in expense of $1,125 for a net impact to the operating budget of $22,875.
Update Break Room

| Department: | Water Production |
| Fund:       | R & E            |
| Budget Unit: | Terry R Hicks Water Production Complex |
| Utility:    | Water / Sewer    |

### Update Breakroom - $10,000

#### DESCRIPTION OF PROJECT
The breakroom at the Hicks Plant has had no improvements since the building was constructed in 1999; all appliances and cabinets are 19 years old. Because plants have to be manned at all times, the operators have their meals in the breakroom during their shifts and need to have working appliances and cabinets.

#### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

</tbody>
</table>

High Service Pump Rebuild (2) - $60,000

**DESCRIPTION OF PROJECT**

This project is to rebuild two High Service Pumps that pump treated water from the water production plant to repump stations that distribute water throughout the County. The maintenance that will be performed will include the replacement of motors and will extend the life of these pumps and maintain their output.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Available</th>

<td>$0</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

There will be a neutral impact on the operating budget for this project as it will assist in maintaining current service levels of existing pumps.
Flow Meters/Controllers/Software

**DESCRIPTION OF PROJECT**
This project includes *Flow Meters* that attach to system filters and *Flow-paced dosing controllers* and connects them to the plant SCADA system. The flow meters will accurately measure the rate water travels through the system filters at all times; one of the requirements for our permit. Currently flows are not metered and are estimated based on gpm/ft² of each filter. These flow meters will also help with a *High Rate Filter Study* planned this year which requires the measurement of flow through our filters. Another component of this project is *Flow-paced Chemical Dosing*. Chemicals, including Alum, bleach and chlorine dioxide chemicals, are now being dosed using gravity or volume feed rates that are manually set. Flow-paced dosing adjusts the chemicals released into the water automatically based on the amount of water brought into the plant so no manual adjustments would be needed. This control will provide the maximum amount of treatment with a minimal amount of chemical. It will also lessen the risk of operator error. These components will be linked to the SCADA system which will alert water operators through alarms when water flow increases or decreases.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>

<td>$80,000</td>
<td>$4,000</td>
<td>$4,000</td>
<td>$4,000</td>
<td>$4,000</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**
The primary purpose of this project is to meet Georgia’s Environmental Protection Division (EPD) permit requirements. Improving the accuracy of chemical dosing with this system may affect chemical costs. The impact to chemical expenses will not be known until chemical trends are measured after implementation but an increase of $4,000 in annual maintenance of equipment and software is estimated.
CCWA updates its Master Plan every ten years, with five year updates. The 2020 Strategic Master Plan will need to be initiated in FY 2018-2019 and will include a comprehensive look of project needs across CCWA. The first phase of the project will include an update of the Water Production and Water Reclamation Facility Evaluation study that was completed in 2016. This phase establishes and confirms the direction of CCWA as it relates to the number of plants in operation. Once that is complete, identification of the individual projects needed at the facilities can be identified, as well as other project needs required to support CCWA’s overall strategic direction. A ten-year plan including cost and schedule estimates will be included.

Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>

<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0</td>
<td>$750,000</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

IMPACT ON OPERATING BUDGET

The Strategic Master Plan will identify the capital improvements needed throughout the Authority over the next ten years. The 2015 Update assessed over $350 million in capital projects. The impact to the FY 2018-2019 operating budget will be the labor hours of CCWA staff to assist in workshops during the development of the Plan and is difficult to estimate due to the number of staff, their positions, and the time of involvement as meetings have not been scheduled. Additionally, the ongoing impact to the operating budget will be specific to the completed capital projects constructed under this plan.
One project that is currently underway is an update of CCWA’s Distribution System Model. As part of the scope of that project, once the model is developed and calibrated, several operational analyses will be conducted. The specific scenarios to be modeled are in the process of being defined, however CCWA anticipates that several capital project needs will be identified once the model provides answers and solutions to various scenarios. For example, the model may be used to identify water age issues in certain areas of the county. Several potential solutions are likely to be recommended and will require funding to implement. This allocated budget amount is being reserved in Renewal and Extension to begin saving for the recommended project. [WP 2018-10]
This set of sewer line jobs will include the inspection of sewer line installations donated as part of new developments, along with inspection of sewer line stub-outs. These stub-outs will serve adjacent, unsewered property.

### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0</td>
<td>$10,000</td>
<td>$15,000</td>
<td>$15,000</td>
<td>$15,000</td>

<td>$18,388</td>
<td>$21,861</td>
<td>$25,334</td>
<td>$28,807</td>
<td></td>
</tr>
</tbody>
</table>

### IMPACT ON OPERATING BUDGET

There is no impact on the operating budget of the inspection part of the capitalized infrastructure. However, the inspections done are for new sewer infrastructure and that will impact the operating budget at a rate of $0.61/ft. The 3-year average donated pipe infrastructure is $611,000. Maintenance costs are based on the feet of pipe infrastructure. At an estimated $108/ft., that is an additional 5,555 feet to maintain and would have an impact to the annual operating budget of $3,388.
Meter Inspections

**Department:** Program Management and Engineering  
**Fund:** R & E  
**Budget Unit:** Construction Services  
**Utility:** Water / Sewer

**Meter Inspections - $20,000**

**DESCRIPTION OF PROJECT**
This set of meter jobs will include the inspection of larger meter installations donated as part of new commercial development.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Year</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>Available</td>

<td>$20,000</td>
<td>$20,000</td>
<td>$20,000</td>
<td>$20,000</td>
</tr>
<tr>
<td></td>
<td>$163</td>
<td>$326</td>
<td>$489</td>
<td>$652</td>
<td></td>
</tr>
<tr>
<td>$20,000</td>
<td>$20,163</td>
<td>$20,326</td>
<td>$20,489</td>
<td>$20,652</td>
<td></td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**
There is no impact on the operating budget of the inspection part of the capitalized infrastructure. However, the inspections done are for new meters and that will impact the operating budget at a rate of $11.65/meter. The average number of meters donated annually over the previous 3 years is 14. The additional annual cost of maintenance for the estimated 14 meters that this inspection budget would be $163.
Galvanized Water Main Replacements

**DESCRIPTION OF PROJECT**
This project is a continuation of a 20 to 30 year program of replacing galvanized steel water mains. When these pipes age they cause a number of problems within our Distribution System. We replace the galvanized lines with ductile iron pipe or 2" copper, based on customer service needs and fire protection. The cost to replace this pipe is approximately $100/ft. This amount budgeted will replace approximately 3.3 miles of galvanized pipe. The Board of Directors allocated an additional $500,000 from FY 2017-2018 surplus for this program which will add another mile of pipe replacement planned for this budget year. [SMP 601]

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Year</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>

</tr>
<tr>
<td>$2,250,000</td>
<td>$2,271,710</td>
<td>$2,275,160</td>
<td>$2,278,610</td>
<td>$2,282,060</td>
<td></td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**
The impact on the operating budget for $1,750,000 will consist of general maintenance of the replaced existing infrastructure of 3.3 miles of pipe (~17,500 ft.) is $9,450 ($0.54/ft.). The annual general maintenance expense for the total project spend of $2,250,000 in FY 2018-2019 to replace 4.3 miles of pipe (~22,704 ft) is $12,260 ($0.54/ft.).
This project will implement repairs, rehabilitations, or replacements of the wastewater collection system based on the findings of the Sanitary Sewer Evaluation Survey (SSES) program. The solutions implemented will be the most cost effective for reduction of Inflow and Infiltration (I/I) in the system at the W.B. Casey, Northeast, and Shoal Creek Basins. Cost to replace is approximately $800,000 per mile or about $152/ft. The amount budgeted of $2 million will replace about 2.5 miles (~13,200 ft.). [SMP 614]
Several replacement projects are required along the Jesters Creek Outfall East line. The projects were found upon review of inspection data and through visual inspections along the line. Design services are required to develop plans and specifications to complete the pipe replacements. [SMP 617][WP 2016-01]

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>

<tbody>
<tr>
<td>$0</td>
<td>$300,000</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

There is no impact on the operating budget this design work. It will provide detailed specifications and cost estimates for the pipe replacements that will done.
Customer Information System (CIS) Integration Support

**Department:** Program Management and Engineering

**Fund:** R & E

**Budget Unit:** Geographic Information System

**Utility:** Water / Sewer

Customer Information System (CIS) Integration Support - $75,000

**DESCRIPTION OF PROJECT**

The existing Customer Information System (CIS) is being replaced with Cayenta and is currently underway. One primary goal of the CIS project is to allow customer service representatives the ability to use a single software (Cayenta). This requires Cayenta and Cityworks (the linear asset computerized maintenance management system) to be integrated at some level. Currently, that level of integration has not yet been defined. It is very likely programming changes to Cityworks will be required to allow the software systems to communicate and send information from Cayenta to Cityworks, and from Cityworks to Cayenta. This project will be used to acquire outside services to assist with the integration, if needed, and once the project is defined.

[SMP 157][WP 2015-09]

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th></th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>Available</td>
<td>$75,000</td>
<td>($1,560)</td>
<td>($1,560)</td>
<td>($1,560)</td>
<td>($1,560)</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

The impact on the operating budget for this project will be a savings in labor hours due to automating the flow of information between the software system field crews use and the system that customer support staff use. The current process requires logging into different systems, emails and phone calls. It is estimated that it could save about 2 hours of labor a
JD Edwards is being upgraded and one of the goals of the project is to have JD Edwards and Cityworks (the linear asset computerized maintenance management system) be integrated at some level in terms of assets and costs. Currently, that level of integration has not yet been defined. It is very likely programming changes to Cityworks will be required to allow the software systems to communicate data to and from JD Edwards. This project will be used to acquire outside services to assist with the integration, if needed, and once the project is defined.

Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>
<th>Year</th>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$0</td>
<td>$75,000</td>
<td>($6,500)</td>
<td>($6,500)</td>
<td>($6,500)</td>
<td>($6,500)</td>
</tr>
</tbody>
</table>

IMPACT ON OPERATING BUDGET

The impact on the operating budget for this integration is a savings of $6,500 in labor. This savings would result from automating the flow of information between the software system pipe field crews use and the ERP used for work orders, time entry and warehouse issues. The current process requires double-entry into both Cityworks and JDE systems which does not always happen when crews are busy. This integration will provide better job costing, save multiple different staff duplicating transactions, and save warehouse staff time in locating the appropriate place to assign inventory issue costs. This double-entry and other inefficiencies is estimated to cost over 5 labor hours a week plus leads to incomplete information.
Large Meter Replacements

**Department:** Distribution & Conveyance  
**Fund:** R & E

**Budget Unit:** D&C Department Manager  
**Utility:** Water / Sewer

Large Meter Replacements - $500,000

**DESCRIPTION OF PROJECT**

This project will consist of the replacement of large meters that are not repairable or in need of full retros with backflows. With an average cost of $25,000 per large meter, the budgeted amount of $500,000 should replace about 20 meters.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>

<tbody>
<tr>
<td>$0</td>
<td>$500,000</td>
<td>$233</td>
<td>$233</td>
<td>$233</td>
<td>$233</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

This project replaces existing meters so it should have no additional impact to the operating budget. Ongoing maintenance of 20 existing meters (with backflows) at $11.65 per meter is $233 per year.
Department of Transportation (DOT) – Pipe Extension and Relocation at Stagecoach and Steel Roads

**DESCRIPTION OF PROJECT**

This is part of a Department of Transportation (DOT) project for road reconstruction and a line extension for a new school under construction. It will replace 3,700 feet of existing 6-inch water main with a larger 12-inch water main and connect the water mains on Steele Road from Stagecoach to Anvil Block Road; a line extension of 3,000 feet of 8-inch pipe.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>

<td>$1,620</td>
<td>$1,620</td>
<td>$1,620</td>
<td>$1,620</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

The impact to the operating budget is neutral. The general maintenance of water main is $0.54 per foot and ongoing maintenance of this existing infrastructure is $2,052 for 3,800 feet of distribution (water) pipe.
Casey Capacity Evaluation

**Department:** Water Reclamation

**Fund:** R & E

**Budget Unit:** WB Casey WRRF

**Utility:** Water / Sewer

**Casey Capacity Evaluation - $100,000**

**DESCRIPTION OF PROJECT**

CCWA partnered with CH2M to perform a facility evaluation of water and water reclamation facilities to determine the optimal number of facilities to operate and maintain moving into the future. The evaluation project determined that it would be feasible to decommission our Shoal Creek WRF and pump the flow to the W.B. Casey WRRF for treatment. As part of the CCWA strategic master plan a capacity evaluation needs to be conducted at the W.B. Casey WRRF to determine what upgrades are needed to handle the additional loading at the plant. This is needed before moving into the design phase of upgrading Casey. This project is also needed to achieve the Water Reclamation Level of Service #2: Provide adequate treatment at WRF’s for new and existing customers. Casey WRRF Capacity Projects /Solids Evaluation

[SMP 708 - Dewatering Facility][SMP 710- Casey WRRF Capacity Projects - 4th Bioreactor Basin (BRB)][WP 2018-09]

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<table>

<tbody>
<tr>
<td>$0</td>
<td>$100,000</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

The impact of this evaluation will have a neutral impact on the operating budget but will determine capacity needs that will become capital improvement projects at the W.B. Casey WRRF.
Secondary Clarifier Baffles

**Department:** Water Reclamation  
**Fund:** R & E

**Budget Unit:** WB Casey WRRF  
**Utility:** Water / Sewer

### Secondary Clarifier Baffles - $60,000

**DESCRIPTION OF PROJECT**
This project is for the custom build and installation of McKinney baffles in the 1, 2 and 3 secondary clarifiers at the W.B. Casey WRRF. This is needed to prevent solids carry over at the scum beach and during high flows. These baffles will enhance the water quality and efficiency of the clarification process as it will decrease the density of the currents in the clarifier which allow the solids to remain separated at the bottom of the clarifier. This project will also help the Water Reclamation Staff achieve one of our most important levels of service. Water Reclamation Level of Service #1: Discharge High Effluent Quality at all WRFs.

### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

<table>
<thead>
<tr>
<th>Available</th>
<th>2018</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
<th>2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0</td>
<td>$60,000</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
<td>$0</td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**
There is no impact to the operating budget. This is a change in type of baffle used; required for treatment. The primary purpose of this project is to enhance the clarification process by reducing the amount of particulates carried over the weir into the effluent. The baffles are designed to improve the clarifier and overall water quality.
Scum Trough Assembly

**Department:** Water Reclamation  
**Fund:** R & E  
**Budget Unit:** WB Casey WRRF  
**Utility:** Water / Sewer

### Scum Trough Assembly - $37,000

**DESCRIPTION OF PROJECT**
This request is to replace the current scum trough assembly in one of the three primary clarifiers at the W.B. Casey WRRF. The tipping troughs have extensive corrosion due to high levels of hydrogen sulfide in the process and will require replacement. The new unit will be made of stainless steel and should have a longer service life. The plan will be to have them all replaced over the next couple of years. This project will help the Water Reclamation staff meet our Water Reclamation Level of Service #9: Eliminate quantity of grease present in CCWA conveyance system and WRF’s.

#### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

**IMPACT ON OPERATING BUDGET**
This project will have a neutral impact on the operating budget. This is a replacement of an existing trough and will maintain current operational service levels.
Primary Clarifier Solids Meter

**Department:** Water Reclamation  
**Fund:** R & E

**Budget Unit:** WB Casey WRRF  
**Utility:** Water / Sewer

---

**Primary Clarifier Solids Meter - $24,000**

**DESCRIPTION OF PROJECT**

As part of CCWA’s efficiency and innovation initiatives, the W.B. Casey WRRF Staff is requesting to purchase a primary clarifier solids meter for real time monitoring of the primary clarifier solids concentration. This particular solids meter uses microwave technology for reliable and accurate measurement of wastewater sludge treatment applications (0 – 40% total solids). This meter will automate the solids concentration being discharged from the primary clarifiers and outputs from the meter will be tied into the plant’s SCADA system for monitoring and control. This meter should increase efficiency of the operation of the primary clarifiers by minimizing the amount of water being pumped to the sludge blending tank and reducing the amount of time operational staff have to manually sample the primary sludge concentration. This project will also help the Water Reclamation Staff achieve our Water Reclamation Level of Service #5: Achieve at most efficient cost of service to our customers.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

**IMPACT ON OPERATING BUDGET**

The annual impact to the operating budget will be a savings of approximately $10,950 in wages by eliminating 550 labor hours that it takes to manually sample sludge.
Polymer Tank

**Department:** Water Reclamation  
**Fund:** R & E

**Budget Unit:** Sludge Pelletizing  
**Utility:** Water / Sewer

**Polymer Tank - $50,000**

**DESCRIPTION OF PROJECT**

This project is needed to procure a new polymer tank, pump, piping and other essential materials for relocating the tank to new location in the Pelletizing Facility. The existing polymer tank is old and needs to be replaced and relocated to a more suitable location. This project will make the polymer mixing procedure for the Operators more efficient and will save time. Polymer is used in the pelleting process to convert solids from sewer waste into fertilizer pellets that are then sold.

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

Cured in Place Pipe

**DESCRIPTION OF PROJECT**

Cured in Place is a means of rehabilitating and restoring existing pipe by using a felt tube saturated with resin and coated with a waterproof layer. This tube is inserted into the existing pipe system and allowed to harden, essentially creating a new pipe. This work is performed by an outside annual services contractor and is part of a 10-year strategic master plan program. Estimated annual funding for CIPP is $1,500,000. At a cost of $330 per linear foot, approximately 4,500 feet, or 3/4 of a mile, of stormwater pipe can be relined per year. [SMP 214]

**Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1**

<td></td>
</tr>
</tbody>
</table>

**IMPACT ON OPERATING BUDGET**

The impact on the operating budget for this project will be neutral as it restores existing infrastructure. The cost to continue to maintain 4,500 feet of existing infrastructure is $3,645. ($0.81/ft.)
Removal and Replacement

**Department:** Stormwater  
**Fund:** Construction

**Budget Unit:** Stormwater Maintenance  
**Utility:** Stormwater

### Removal and Replacement (R/R) - $1,773,001

**DESCRIPTION OF PROJECT**

Removal and Replacement involves the actual excavation, repair, and/or replacement of Stormwater Infrastructure. These projects usually involve an effort where larger diameter infrastructure is being replaced or a longer term effort is required to replace existing infrastructure. This year, an emphasis is being made to include more linear assets regardless of pipe diameter. These jobs are usually performed by an annual outside services contractor but more jobs performed by internal staff will be captured. This work is part of a 10-year strategic master plan program. Estimated annual funding for R/R is $1,500,000. At a cost of $300 per linear foot, approximately 5,000 feet, or almost one mile, of stormwater pipe can be replaced per year. This budgeted amount will replace 5,910 feet of pipe.  

[SMP 214]

### Projected Expenditures - Next Five Consecutive Fiscal Years Beginning May 1

FISCAL POLICIES

Fiscal Policies
The financial policy document, comprised of individual yet cohesive policies, incorporates many of the Authority’s financial management practices that are used by CCWA staff as guidelines for operational and strategic decision making related to current and future financial matters.

The purpose of establishing these policies is to identify acceptable and unacceptable courses of action, thus establishing parameters in which the Authority can operate as well as providing a standard against which the Authority’s fiscal performance can be reviewed. In all the Authority’s policies, the overriding consideration is to assure that its services are provided to its customers into perpetuity. Some policies are flexible when they are utilized by CCWA staff as performance measurement tools to monitor the Authority’s finances; others are restrictive to emphasize accountability.

Due to the above reasons, these policies are drafted as a living document to maintain their effectiveness in order to accommodate changes. CCWA staff and Board members review these policies on a recurring basis to accommodate minor changes to the existing financial policy or major shifts in financial priorities, as approved by the CCWA Board of Directors at its sole discretion.

The Authority’s financial policies encompass the following functional areas:

- Operating Budget Policy
- Capital Budget Policies
- Accounting, Auditing and Financial Reporting Policies
- Revenue Administration Policy
- Expenditure Administration Policy
- Debt Management Policy
- Investment Policy
- Reserve Policy
- Risk Management Policy
- Purchasing Policy

Operating Budget Policy
Operating Budget policies are adopted to ensure that a sound business approach is taken in the course of preparing the annual expenditure plan. The guiding principle of the Authority’s budgetary policies is to achieve structural balance between revenues and expenditures to endure that desired service levels are provided on a sustained basis. To remain a viable, ongoing enterprise the Authority’s annual operating expenditures must be based on a stable stream of revenues. These principles are designed to encourage consideration of long-term objectives rather than short-term benefits. Adherence to these policies will enable the Authority to maintain a stable level of services, expenditures and user rates in future periods.

Board guidelines with respect to the Authority’s operating budget are as follows:

- Provide a mechanism for exercising managerial control over cash flows. The Authority shall annually adopt a balanced budget where operating revenues are equal to, or exceed, operating expenditures for each twelve-month cycle.
- The operating budget will be prepared utilizing the modified accrual basis of accounting as a means of estimating the flow of financial resources on an annual basis.
- The Authority will annually submit its budget document to the Government Finance Officers Association (GFOA) for consideration of its adherence to the criteria established for receiving the “Distinguished Budget Presentation Award”.

The Authority will finance all current expenditures with current revenues. The Authority will avoid budgetary procedures that balance current expenditures through the obligation of future resources. The Authority will not use short-term borrowing to meet operating budget requirements.

The Authority will utilize performance measures and work load indicators to provide qualitative and quantitative information about operations.

Departments must justify each of their budgetary requests for funding. The budget process is intended to weigh all competing requests for resources, within expected fiscal constraints.

All unencumbered operating budget appropriations will lapse at the year-end unless their carry-over is specifically approved by the General Manager. Encumbered balances will be re-appropriated in the following fiscal period.

The Authority will maintain a budgetary control system to ensure adherence to the budget and will prepare timely financial reports comparing actual revenues, expenditures and encumbrances with budgeted amounts.

Budgeting procedures will be used to identify distinct functions and activities and to allocate resources to perform these functions and activities as required. The operating budget shall be developed to control both direct and indirect costs of programs and services wherever practical.

The Authority will estimate its annual revenues by an objective analytical process in a prudent manner.

All departments will share in the responsibility of meeting policy goals and ensuring long-term financial health. Future service plans and program initiatives will be developed to reflect current policy directives, projected resources and future service requirements.

The appropriations portion of the operating budget will contain a sufficient level of contingency funds that are unplanned and available to meet unanticipated expenditures that might arise.

The operating budget will provide for adequate maintenance of capital equipment and facilities, as well as for their orderly replacement.

The Board of Directors will adopt the annual operating budget for the Authority no later than April 20th.

Funding priorities in the Operating Budget will be aligned with the Strategic Master Plan that has been prepared by the management team.

Information from the annual operating budget will be made available to the customers and other interested parties via the Authority’s website.

During the year, the Finance Department shall prepare and disseminate quarterly budget-to-actual reports for all operating funds to members of the management team. The report shall include an analysis of the revenue and expenditure activity year-to-date. The document will also discuss any significant deviations from the original budget operating plan.

**Capital Budget Policy**

Capital budget policies are needed to ensure that capital expenditures are well planned and enable the Authority to replace its plant, piping, equipment and other capital assets when needed, without requiring significant fluctuations in the user service charges.

Based on a review of existing capital assets and a comprehensive assessment of future needs, the Authority shall prepare a ten-year capital plan to define the major projects that will need to be addressed during that decade. The plan shall be reviewed periodically and updated as needed.

Using the ten-year plan as a guiding document, the Authority will develop a five-year plan for capital improvements and update it annually.
• The Authority will coordinate development of the capital improvement budget with development of the operating budget. Future operational costs associated with new capital improvements will be projected and included in operating budget forecasts.
• The Authority will provide ongoing preventative maintenance and upkeep on all its assets at a level adequate to protect the Authority’s investment and to minimize future maintenance and replacement costs.
• The Authority will determine the least costly financing method for all new projects.
• The Authority will establish specific replacement criteria (e.g., mileage, hours, age) for rolling stock and heavy equipment based on financial and operational considerations.
• The Authority will develop an annual capital budget schedule for replacement of equipment generally having a replacement cost of more than $5,000. The replacement schedule should cover the succeeding five fiscal years and identify the specific unit and its estimate cost.
• Whenever financially feasible, the Authority will fund its capital budget needs on a pay-as-you-go basis.
• Federal, State, other intergovernmental and private funding sources are sought and used as available to provide supplemental funding for capital improvements.
• Upon completion of any capital project, any remaining appropriated funds for that project will be returned to the undesignated capital project fund balance.
• Capital project proposals should include complete, reliable and attainable cost estimates. At the time of award of the construction contract, each project should include a reasonable provision for contingencies.
• The Authority will utilize innovative and cost-effective methods for the disposal of unserviceable capital assets.

Accounting, Auditing and Financial Reporting Policies
The purpose of accounting, auditing and financial reporting policies are to ensure accurate and consistent accounting practices that conform to generally accepted accounting principles. These policies promote public confidence in and ensure the integrity of the Authority’s financial system and processes.

Board guidelines with respect to the Authority’s fiscal policies are as follows:
• The Authority will develop an ongoing system of financial reporting to meet the needs of the Board of Directors, the General Manager, department heads and the general public. Reporting systems will monitor the costs of providing services wherever possible. The reporting systems will also promote budgetary control and comparative analysis.
• An independent audit in compliance with Generally Accepted Audit Standards (GAAS) will be performed annually by a qualified, independent auditor in accordance with HB 535.
• The Authority will establish and maintain a high standard of accounting practices. Accounting records and systems will conform to Generally Accepted Accounting Principles (GAAP). These principles will be updated as mandated by the Governmental Accounting Standards Board (GASB), which is the legal authority charged with defining GAAP.
• The Authority will prepare a Comprehensive Annual Financial Report (CAFR) in accordance with Generally Accepted Accounting Principles (GAAP) for governmental entities. The Authority will strive to prepare the Comprehensive Annual Financial Report to meet the standards of the GFOA Certificate of Achievement for Excellence in Financial Reporting Program.
• The Authority will follow a policy of full disclosure on every financial report.
• The Authority will maintain accurate records of all assets to ensure a high degree of stewardship for property under its control.
• Regular monthly and annual financial reports will present a summary of financial activity for the various individual accounts of the Authority.
• Information from the Comprehensive Annual Financial Report will be made available to the customers and other interested parties via the Authority’s web-site.

Revenue Administration Policy
Revenue administration policies are needed to ensure that the Authority has a stable revenue based on which to fund its operations over the long-term. The primary objective of these policies is to ensure that sufficient revenues are generated so that the Authority remains an ongoing concern.

Board guidelines with respect to the Authority’s revenue administration policy are as follows:
• The user charges being assessed customers should represent the full cost of providing service.
• Annually, a five-year forward operating forecast will be prepared. Based on those estimates, planned rate adjustments on a consistent basis will be programmed as part of the financial plan.
• User fees will be adjusted periodically to ensure that estimated net revenues (i.e., revenues after paying operating expenses) will remain at a minimum of 1.5 times the annual debt service amount.
• Revenues generated from impact fees will be designated for capital expenditures.
• The Authority shall establish, and annually re-evaluate, all user charges and fees to ensure that they remain at a rate that directly correlates to the cost of providing the associated service.
• Revenues of a limited or indefinite term should be used for capital projects or one-time operating expenditures to ensure that no ongoing service program is lost when such revenues are reduced or discontinued.
• Grant applications to fund new service programs with State or Federal funds will be reviewed by the Authority, as they become available, with due consideration being given to whether user fee revenues will be required to support these programs when external funding is no longer available.
• The Authority will follow a vigorous policy of collecting all revenues that are due to the Authority.

Expenditure Administration Policy
Expenditure administration policies are needed to ensure that the authority exercises adequate control over its expenditures and analyzes them in terms of their long-term financial impact. The overriding objective of these policies is to help ensure that the Authority is able to maintain its user rates at the lowest possible level.

Board guidelines with respect to the Authority’s debt policy are as follows:
• Expenditures should be controlled by management and should stay within the amount of appropriated funds.
• High priority will be given to expenditures that will reduce future operating costs, such as increased utilization of technology and equipment, and prudent business methods.
• Should the revenue projections fall short of the projected expenditures, the Finance Director shall convey service alternatives to the General Manager to match the projected revenues.
• A continuing effort shall be made to reduce duplicative and inefficient functions within the Authority. To that end, business process redesign and reorganization will be encouraged whenever increased efficiency and effectiveness can be demonstrated.
Debt Policy
Debt policies are adopted to define the role of debt in the Authority’s total fiscal strategy. The principle goal of these policies is to avoid using debt in a way that weakens other segments of the financial structure of the Authority. The Authority’s primary objective is to minimize debt service and issuance costs; maintain access to cost-effective borrowing; achieve the highest practical credit rating; ensure full and timely repayment of debt; maintain full and complete financial disclosure and reporting; and ensure compliance with applicable state and federal laws.

Board guidelines with respect to the Authority’s debt policy are as follows:

- The Authority will confine long-term borrowing to capital improvements or projects that cannot be financed from current revenues. The Authority will not use debt for the purchase of vehicles and heavy equipment.
- When the Authority finances capital projects by issuing bonds, it will pay back the bonds within a period not to exceed the expected useful life of the project.
- The Authority will not use long-term debt for current operations.
- Bond issues shall be planned to mitigate substantial year-to-year shifts in future debt service requirements.
- The Authority will follow a policy of full disclosure on every bond prospectus.
- Refinancing or bond refunding will only be undertaken when there is significant economic advantage to the Authority, and when it does not conflict with other fiscal or credit policies. As a savings target, the Authority looks to project a net present value savings, after bond issuance costs, of at least 3 percent of refunded principle.
- The Authority shall comply with all Internal Revenue Service arbitrage rebate requirements for bond indebtedness. As a rule, calculations as to the liability amount for each series should be prepared annually.
- For all competitive and negotiated sales, underwriters will be required to demonstrate sufficient capitalization and experience related to the debt issuance.
- The maintenance of the best possible credit rating shall be a major factor in all financial decisions.

Investment Policy
Investment policies are needed to ensure the most efficient use of the Authority’s idle funds and to identify the preferred investment strategy. The primary objective of these policies is to provide a reasonable rate of return on idle funds while limiting the amount of risk involved.

Board guidelines with respect to the Authority’s investment policy are as follows:

- The Authority will make arrangements for banking services on a contractual basis for a period not to exceed five one-year terms. The contract will contain a fee schedule for each service rendered.
- The investment program shall comply with all Authority related legislation and Federal/State regulations for investing public funds and safekeeping/security requirements.
- The investment program shall be operated based on the following principles, with priorities placed on the order as listed below:
  - **Legality**: All investments will comply with State laws and local ordinances. Specific requirements, such as those set forth in bond ordinances, will take precedence and could further restrict investment options;
  - **Safety of Principal**: Principal is protected from loss with secure investment practices and collateralization;
• **Maintenance of Adequate Liquidity:** A sufficient quantity of investments is readily convertible to cash when needed to meet current obligations without incurring losses; and

• **Yield or Return on Investment:** The earnings rate on investments is maximized without diminishing the other principles.

- The investment program should use a competitive selection process for investments with maturity dates greater than 90 days. Investments should be placed with only qualified financial institutions.
- The investment program should provide for a system of internal control over investments and timely financial reporting of investing activities.
- The accounting system will provide regular information concerning cash position and investment performance.
- Where permitted, the Authority will pool its cash resources from various accounts for investment purposes.
- All Authority bank accounts shall be reconciled on a timely basis.

**Reserve Policy**

Reserve policies are needed to provide the working capital that is needed to address significant fluctuations in cash flows that may occur during the fiscal year. These principles also provide a cushion against unexpected revenue and income interruptions.

Board guidelines with respect to the Authority’s reserve policy are as follows:

- The Authority shall maintain a minimum of $1,500,000 in the Renewal and Extension Fund. Monies held in this reserve fund may only be expended upon authorization of the Board of Directors for unanticipated operating and maintenance activities.
- The Authority will maintain reserves in compliance with all debt service requirements to maintain bond ratings and the marketability of bonds. As a rule, cash balances will be maintained at such a level, as determined by Senior Management, necessary to provide the Authority with sufficient working capital and a comfortable margin of safety to address emergencies and unexpected declines in revenue without borrowing.
- The Authority shall set aside sufficient funds to cover future postemployment benefits as employees earn them.

**Risk Management Policy**

Risk management policies are needed to ensure that the Authority undertakes a diligent effort to prevent loss or degradation of its assets and to reduce its exposure to liability.

Board guidelines with respect to the Authority’s risk management policy are as follows:

- The Authority shall transfer risk to other parties, where cost effective, by purchasing insurance.
- Insurance policies will be analyzed regularly to assure proper coverage and deductibles.
- The Authority shall shift the legal and financial responsibility to third parties who perform work or provide services to the Authority for losses or potential losses caused by the actions of those third parties. This transfer of risk may occur through a variety of means in leases, purchase and service agreements, and other contracts. The transfer of risk shall be made formally and in writing and may include bid bonds, payment bonds, performance bonds, fidelity bonds indemnification agreements, insurance requirements and the required provision of certificates of insurance.
Purchasing Policies

It is essential that uniform purchasing policies be followed and observed when purchases are made on the behalf of Clayton County Water Authority ("Authority") to ensure the best product and services are obtained. The primary purpose of these policies is to provide an equitable and fair methodology for acquiring the goods and services needed for the Authority’s operations at the lowest total cost. Purchasing policies are needed to ensure that the Authority obtains the best product for money that is expended.

Board guidelines with the respect to the Authority’s purchasing policy are as follows:

- The Authority will strive to obtain the highest quality of goods and services for the most economical costs. Bulk purchases, quantity discounts, standardization of common items, and other approaches will be used to acquire goods and services economically.
- It is the intent of the Authority to establish uniform regulations and procedures to provide for an efficient and fiscally responsible system for the purchase of materials and services necessary for the effective operations of the Company.
- All departments of the Authority must utilize competitive bidding procedures as outlined in the purchasing policies. Bids will be awarded on a nondiscriminatory basis with appropriate efforts to include local and disadvantaged businesses.
- The Authority will maintain a purchasing system that provides needed materials and services in a timely manner to avoid interruptions in the delivery of services.
- The Authority will strive to take advantage of attractive payment terms by seeking the necessary approvals and processing checks in a timely fashion.
- Purchases in excess of a unit price of one hundred dollars ($100) or an aggregate value of one hundred dollars ($100), except as supported by an executed contract, or under the Purchasing Card or Credit Card program shall be by purchase order. These goods or services should not be included in a price agreement or available in inventory, when possible.
- Purchases of any item, group of items or service, whether by purchase order, or contract, with a total cost of fifty thousand dollars ($50,000) or more shall be competitively priced utilizing sealed bids or sealed request for proposals with the exception of purchases made through the State of Georgia pursuant to Title 50, Chapter 5, Section 100 of the Official Code of Georgia Annotated or goods and services that are of an expected and continuing nature, including but not limited to replenishment of inventory goods, utility bills, travel, seminar fees, conference and registration fees, membership dues, subscription costs, and maintenance agreements. Notification of sealed bids or request for proposals will be advertised in the County’s Legal Organ or on the CCWA website a minimum of twice in a four-week period prior to the bid or proposal opening. The first advertisement must occur at least four weeks prior to the opening of the sealed bids or proposals with the second advertisement following no earlier than two weeks from the first advertisement. The Board of Directors shall make awards to vendors. Contracts may not be divided for purposes of avoiding the limitations of this section.
- Purchases of any item, group of items or service whose total cost is less than fifty thousand dollars ($50,000) may be competitively priced if it is determined to be in the best interest of the Authority. Any of the competitive pricing methods, i.e., sealed bids, Request for Proposal, or quotes may be used. The General Manager or designee shall make awards to vendors.
- Management may elect to contract on an annual basis for supplies and/or services under a Master Contract and make specific purchases or assignments by issuing Purchase Orders; such annual contracts must be no more than fifty ($50,000) without the prior approval of the Board. Such situations will require annual certificates of insurance and contractual provisions as required.
• Sole Source Purchases would only occur when there is only one available supplier of a good or service that meets the needs of the Authority and meets one or more of sixteen qualifying criteria. Negotiation should be used to complete the terms and conditions for this purchase. Sole source approval shall be effective for a period of three (3) years after which time a search of the market for adequate competition must be performed to justify continued sole source contract.

• The provisions of the Purchasing Policy shall not apply to the payment of recurring bills including, but not limited to, utility payments. Said payments may be made when due to avoid the accrual of interest or the imposition of late payment fees and/or penalties.

• In the event of an emergency condition, which threatens the water, sewer, or storm water system’s ability to operate, the General Manager is to contact the Chairman of the Board as soon as practically possible and proceed without competitive pricing, if necessary. If the Chairman is not available, then the remaining officers in the order of Vice Chairman, then Secretary/Treasurer will be notified. The scope shall be limited only to the emergency procurement of goods and services exceeding $50,000 and necessary to meet the emergency. All emergency contracts for public works or improvements in excess of $50,000 shall apply.

• Purchases shall be in compliance with the approved budget a single budget revision of less than fifty thousand dollars ($50,000) shall be approved by the General Manager whether for an individual item or in aggregate.

• Upon the recommendation of the General Manager, purchases may be made through the State of Georgia pursuant to Title 50, Chapter 5, Section 100 of the Official Code of Georgia Annotated, without the necessity of further competitive pricing. For any such purchase of less than fifty thousand dollars ($50,000), the General Manager or his/her designee may make awards to vendors for items approved in the budget without further action of the Board. For all other contracts, Board approval shall be required.

• Competitive bidding will not be required for repair, maintenance or reconditioning of equipment and/or devices by the manufacturer or if there is only one manufacturer-authorized firm for purchases up to one hundred thousand dollars ($100,000) with Board approval.
  • This provision will be utilized when it is advisable to take advantage of certain expertise or equipment not available from other or to comply with or protect warranties. For non-warranty repair work, the requesting Department should consult with Contracts and Procurement for advice on how to proceed. In some cases, competitive bids may not be in the best interest of the Authority, if they require the disassembly, reassembly, and transport of the equipment to obtain repair estimates. In such cases, the Department and Contracts and Procurement will attempt to achieve competition by utilizing various vendors over a period of time. In the procurement of automotive repair parts, the competition among vendors may be limited in certain instances due to the stringent delivery time requirements for parts.

• Consistent with Official Code of Georgia Annotated, Title 14, Chapter 7, Section 2, the purchase of Professional Services shall not be subject to competitive pricing:
  • ‘Profession’ means of profession of certified public accountancy, architecture, chiropractic, dentistry, professional engineering, land surveying, law, pharmacy, psychology, medicine and surgery, optometry, osteopathy, podiatry, veterinary medicine, registered professional nursing, or harbor piloting.
• In any situation where the Authority has requested bids, proposals, or any other competitive offers for a contract for the provision of goods and/or services, the Board may, except in the case of contracts for “Public Works,” award the contract to a proposer other than the proposed offering the lowest price where:
  • The difference in price between the low proposal and the preferred proposal is nominal;
  • The Board determines that the preferred proposal provides the most cost-effective option due to the closer proximity of the preferred proposer’s place of business to the affected Authority facility or facilities; and
  • The instructions to bidders, request for proposals, or other document produced by the Authority and pursuant to which proposals are received provides express notice that the Authority will consider proximity in its decision-making process.
  • Other evaluation factors may weigh the decision to award to a bidder without regard to price such as a qualifications-based procurement where price is not the only evaluation criteria.

• As a part of these purchasing policies, the Clayton County Water Authority will adhere to the following regarding contracting with Minority- and Women-owned Enterprises and Small Local Business Enterprises:
  • As used in this section, the terms used have the following definitions:
    ▪ “Minority Business Enterprise” means a business entity which is at least fifty-one percent (51%) owned and controlled by one or more African American, Hispanic, Asian American, Native American, Pacific Islander or disabled citizens of the United States and such person or persons operate the business; and
    ▪ “Female Business Enterprise” means a business entity which is at least fifty-one percent (51%) owned by women who are United States citizens and who also control and operate the business.
    ▪ “Small Local Business Enterprise” means a small locally based business concern whose average annual gross receipts for the previous three years must not exceed (1) Construction Firms- $5,000,000 (2) Professional Services Firms, except architectural and engineering firms - $1,000,000, Architectural & Engineering - $2,000,000 and Goods & Services – less than 100 employees.
  • The Clayton County Water Authority (the “Authority”) will provide equal opportunity for all and not discriminate against anyone, regardless of race, color, religion, national origin, age, gender, sexual orientation, or disability. It is also the policy of the Authority to award contracts for sale or purchase of goods or services to the responsible and responsive bidder whose proposal is determined, in writing, to be the most advantageous to the Authority. It is further declared the policy of the Authority to take steps to provide economic opportunity, ensure nondiscriminatory results and practices, and involve minority business enterprises and female business enterprises fully in the process by the Authority of the awarding of contracts for sale or purchase of goods or services. These policies, together with the general principles of sound procurement, are intended to achieve the maximum practical opportunities
for minority business and female business enterprises by the Authority, consistent with Constitutional principles of equal protection and to protect the assets of the Authority;

• The provisions contained in this Policy are intended for all departments of the Authority to consider when the Authority awards contracts for sale or purchase of goods or services. However, it is the responsibility of the Contracts, Compliance and Risk Management Section of the Authority to ensure compliance with the provisions of this policy by all CCWA departments of the Authority. It is the written policy of the Authority to make affirmative and deliberate efforts to assure that small, minority- and women owned business enterprises are involved with the Authority as sources of supplies, services and construction items;

• Affirmative efforts to be made may include but may not be limited to:
  ▪ Including qualified small, minority- and women-owned business enterprises on solicitation lists;
  ▪ Assuring that small, minority- and women-owned business enterprises are solicited whenever they are potential sources; and
  ▪ Where the requirement permits, establishing delivery schedules which will encourage participation small, minority- and women-owned business enterprise.

• This policy is provided as an internal guideline for outreach and nondiscriminatory practices in contract and procurement procedures in the award of contracts for sale or purchase of goods or services by the Authority. This policy does not provide or create any cause or right of action to nor any rights in any third parties against the Authority. This policy does not provide or create any obligation on behalf of the Authority to any third parties. The Authority has discretion to award contracts for sale and purchase of goods or services to the most responsible and responsive bidder.

• The Authority staff shall provide to the Board each month a report detailing the corresponding calendar month’s non-recurring expenditures that are in excess of $20,000 and that did not require Board award under approved purchasing policies.
Statistical Information

The primary purpose of the Statistical Information section is to provide the reader with additional background about the operations of the Authority and the demographics of the customers that we serve.

The data contained in this section includes a tabular and graphical presentation of the results of operations for the most recently completed ten-year period. From this information, the user of this document can identify any significant trends in the revenues and operating expenses for the Company over the last decade.

To assist in the understanding of revenues, schedules showing water and sewer rates, and number of customers are provided. To lend additional perspective on expenses, tables showing the number of gallons of raw water treated and wastewater flows reclaimed are included. As a general rule, much of this information is taken from the Authority’s Comprehensive Annual Financial Report. Thus, the user should be aware that the fiscal year information being reported is as of April 30th of the year designated in the table. In addition, economic information about the Authority’s business environment is provided to help the reader place the budgetary data in the proper perspective. Finally, a number of demographic statistics for the County’s population are included.

Budget Terminology

The primary purpose of the Budget Terminology section is to function as the user’s dictionary. The terms, definitions and explanatory information that follow are provided to help ensure that the reader understands what is being presented in the budget document and to place the narrative information in the proper context. As with any other discipline, numerous terms, acronyms and abbreviations are generic to the accounting, budgeting, stormwater, water production and wastewater reclamation fields. In the following pages, we have attempted to identify those items and have provided additional explanation for each of them.
Glossary

Accounting System: The total set of records and procedures which are used to record, classify and report information on the financial statements and operations of an entity.

Accrual Basis of Accounting: The method of accounting under which revenues are recorded when they are earned (whether or not cash is received at that time) and expenditures are recorded when goods and services are received (whether or not cash disbursements are made at that time).

Aeration: The process that forces compressed air into wastewater. The oxygen keeps the microorganisms alive and sets off a chain reaction; live, eat, and work. Oxygen is an essential ingredient in “activating” sludge.

Appropriation: An authorization made by the Board of Directors that permits officials to incur obligations against and to make expenditures of Authority resources. Appropriations are usually made for fixed amounts and are typically granted for a one-year period.

Asset: All property such as cash, inventory and receivables that is owned by a business or government and may be applied to cover liabilities.

Audit: An independent systematic examination of resource utilization concluding in a written report. It is a test of management’s internal accounting records. It also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements.

Automated Meter Reading (AMR): System that automatically reads customers’ meters using radio frequencies, allowing for more accurate and frequent meter readings.

Balanced Budget: A budget in which estimated revenues and other financing sources equal estimated expenditures and other financing uses.

Basin: The drainage area to a particular point

Biochemical Oxygen Demand (BOD): An indicator of the amount of biodegradable contaminants in wastewater.

Biosolids: Sludge that has been treated to reduce pathogens, organics, and odors, forming a reusable agricultural product.

Bond: An obligation issued by CCWA promising to pay a specified sum of money (called principal or face value) at a specified future date (called the maturity date) along with periodic interest paid at a specified percentage of the principal (interest rate). Bonds are typically issued to fund specific capital improvement expenditures.

Bond Refinancing: The payoff and re-issuance of bonds, to obtain better interest rates and/or bond conditions.

Budget: Proposed plan of revenue and expenditures over a given time period, usually one year.

Budget Adjustment: A procedure utilized by the Water Authority staff to revise a budget appropriation.

Budget Calendar: The schedule of key dates or milestones that the Water Authority follows in the preparation and adoption of the budget.
**Budget Document**: The instrument or publication used by the Budget Officer to present a comprehensive financial plan to the Board of Directors.

**Budget Message**: A general discussion of the proposed budget presented in writing as part of or supplement to the budget document. The transmittal letter explains the principal budget issues against the background of financial experience in recent years and presents recommendations made by the General Manager.

**Budget Unit**: A unique organizational structure used in the accounting system to identify transactions related to that specific segment of operations.

**Budgetary Control**: The control or management of a budget unit or enterprise in accordance with an approved budget for the purpose of keeping expenditures within limitations of available appropriations and available revenues.

**Capital Asset**: These are assets such as plant, property and equipment of significant value and having a useful life of more than one year. Capital assets are also called fixed assets.

**Capital Budget**: A plan of proposed capital expenditures and the means of financing them. The capital budget is usually enacted as part of a complete annual budget, which includes both operating and capital outlays. The capital budget is based on the Authority’s ten-year master plan or capital improvement program (CIP).

**Capital Expenditure/Outlay**: The purchase or improvement of a tangible fixed asset; e.g., land, buildings, and furniture/equipment; with the cost of $5,000 or more and a useful life of at least three years.

**Capital Improvement Program (CIP)**: A plan that identifies the nature, schedule and cost of long-term improvements to CCWA’s infrastructure.

**Clean Water Act (CWA)**: Act passed by the U.S. Congress to control water pollution.

**Comprehensive Annual Financial Report (CAFR)**: This report is prepared by the Finance Department and is usually referred to by its abbreviation. It is a government’s audit report and summarizes financial data for the previous fiscal year in a standardized format that includes three basic sections: introductory section, financial section and statistical section. The CAFR contains three types of financial statements: a statement of net assets, a statement of revenues, expenses and changes in net assets and a statement of cash flows.

**Contingency**: A budgetary reserve set aside for emergencies or unforeseen expenditures not otherwise budgeted.

**Customer Information System (CIS)**: System that CCWA utilizes for customer billing information and other related services.

**Debt**: An obligation resulting from the borrowing of money or from the purchase of goods or services over a period of time. Legal definitions of debt vary from state to state and are determined by constitutional provisions, statutes and court decisions.

**Debt Rating**: An independent opinion, based on a comprehensive quantitative and qualitative evaluation, of a company’s financial position, operating performance, business profile and management. Specifically,
the debt rating reflects a company’s ability to meet its obligations to repay interest and principal on outstanding obligations to investors.

**Debt Service**: The amount of money required to pay maturities of principal on bonds plus the interest due on the outstanding debt, usually reported on an annual basis.

**Debt Service Coverage**: Requirement of CCWA’s bond indenture and Board policy that provides that annual revenue available to pay debt service must exceed annual debt service by a certain percentage. CCWA’s bond indenture for rates requires 120 percent debt service coverage; CCWA Board’s target and the parity bond test is 150 percent debt service coverage.

**Debt Service Funds**: Funds used to account for the accumulation of resources for, and the payment of general long-term debt principal, interest and related costs.

**Debt Service Requirements**: The amount of money necessary for scheduled payment of outstanding debt, both principal and interest becoming due during the fiscal period, and contributions which may be required to accumulate monies for the future retirement of bonds.

**Department**: A basic organizational unit of the Water Authority that is functionally unique in its delivery of services.

**Depreciation Expense**: Depreciation or amortization of the cost of capital assets over their useful lives.

**Distinguished Budget Presentation Awards Program**: A voluntary awards program administered by the Government Finance Officers Association to encourage governments to prepare effective budget documents.

**Enabling Act**: Legislation which established CCWA and defined its purpose and authority. CCWA’s enabling legislation was initially enacted in 1955.

**Encumbrance**: Obligations in the form of purchase orders, contracts or salary commitments which are chargeable to an appropriation and for which part of the appropriation is reserved. They cease to be encumbrances when paid or when an actual liability is set up.

**Enterprise Fund**: A governmental accounting fund in which the services provided are financed and operated similarly to those of a private business. The rate schedules for these services are established to ensure that revenues are adequate to meet all necessary expenditures.

**Environmental Protection Agency (EPA)**: Federal level agency responsible for all environmental issues and policies.

**Expenditure**: Decrease in net financial resources. Expenditures include current operating expenses requiring the present and future use of net current assets, debt service, capital outlays and intergovernmental grants, entitlements and shared revenues.

**Expenses**: Outflows or increases of liabilities from delivering or producing goods, rendering services, or carrying out other activities that constitute the entity’s ongoing major or general operations.

**Fiscal Year**: For the Clayton County Water Authority, the 12 month accounting period that begins with May 1 and ends April 30 of the designated fiscal year; (e.g. FY 2011 ends April 30, 2012).
**Fixed Asset**: Assets of long-term character which are intended to continue to be held or used in carrying out the operations of the Authority, such as land, buildings, machinery and furniture. These items are also referred to as capital assets.

**Flow Monitoring**: Metering of sanitary sewer flows in a basin.

**Force Main Pressure Sewer**: Sanitary sewer pipes that convey sewer by pump stations.

**Full Time Equivalent (FTE)**: The relative value of a position in terms of a 40-hour workweek for 52 weeks, or one full year. For example, a part-time position in which the incumbent works 20 hours would equal one-half or .50 of an FTE.

**Fund**: A fiscal and accounting entity which is comprised of a self-balancing set of accounts which reflect all assets, liabilities, equity, revenue and expenditures (or expenses) necessary to disclose financial position and the results of operations. Funds are established as individual entities in order to segregate financial records for the purpose of legal compliance, different natures of activities performed, measurement of different objectives, and to facilitate management control.

**Fund Balance**: Net position of a governmental fund that is equal to the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources.

**Generally Accepted Accounting Principles (GAAP)**: A body of accounting and financial reporting standards set by the Governmental Accounting Standards Board (GASB) for state and local governments, and by the Financial Accounting Standards Board (FASB) for private sector organizations.

**Geographic Information Systems (GIS)**: A computerized mapping system that captures, stores, analyzes, manages and presents data that is linked to a location.

**Grant**: A contribution by a government or other organization to support a particular function or program.

**Impact Fees**: A payment of money imposed upon development as a condition of development approval, to pay for a proportionate share of the cost of system improvements needed to serve new growth and development.

**Infrastructure**: Physical assets of a government, upon which the continuance and growth of a community depends.

**Interest Income**: Revenue earned for the use of idle monies.

**Interfund Transfer**: Contributions and operating transfers of cash made between the various funds of the Water Authority.

**Investment**: Securities purchased and held for the production of income in the form of interest, dividends or base payments.

**Lease Purchase**: A method of acquiring high cost equipment or property and spreading the payments over a specified period of time.
**Level of Service Standards:** A measure of the amount (and/or quality) of the public facility which must be provided to meet the community’s basic needs and expectations.

**Liability:** Debt or other legal obligation arising out of transactions in the past that must be liquidated renewed or refunded at some future date. This term does not include encumbrances.

**Lift Station:** A pumping facility generally for a sewer line, which is usually used to lift the raw wastewater to a higher elevation so that gravity can take it further down the line.

**Line Item Budget:** A budget that lists each expenditure category separately along with the dollar amount budgeted for each specific category.

**Metropolitan North Georgia Water Planning District (MNGWPD):** Signed into law on April 5, 2001 (2001 S.B. 130). This planning entity is dedicated to developing comprehensive regional and watershed-specific plans to be implemented by local governments in the District. These plans will protect water supplies downstream of the region and minimize potential adverse impacts of development on water in and downstream of the region. The area includes the following 16 counties: Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Fulton, Forsyth, Gwinnett, Hall, Henry, Paulding, Rockdale and Walton Counties.

**Million Gallons a Day (MGD):** A measure of the amount of water processed through a water reclamation or a water production plant in a day.

**Modified Accrual Basis of Accounting:** The method of accounting in which revenue is recognized in the accounting period in which it becomes available and measurable and expenditures are recognized in the accounting period in which the liability (a claim against an asset) is incurred.

**Open Cut:** Trench excavation for pipe installation.

**Operating Budget:** Authorized expenditures for on-going day-to-day services ; (e.g., maintenance, materials, supplies, etc.).

**Outfall:** An 18-inch or larger pipe that is a trunk-line sanitary sewer. These large sewer pipelines connect to smaller sewer lines that navigate waste from various areas of the system up to treatment facilities.

**PACP Codes:** Pipeline Assessment Certification Program, standard codes for pipe condition.

**Pay-As-You-Go Financing:** A term used to describe a financial policy by which the capital program is financed from current revenue rather than through borrowing.

**Performance Measures:** Specific quantitative and qualitative measures of work performed as an objective of a department or business unit.

**Personal Services:** Expenditures for salaries, wages and fringe benefits of a government’s employees.

**Pipe Types:**
- Cast Iron (used in water systems)
• CIPP - Cured in Place Pipe (used in sewer and stormwater systems)
• CMP - Corrugated Metal Pipe (used in sewer and stormwater systems)
  o Aluminized CMP
  o Bituminous CMP
• Concrete (used in sewer systems)
• Copper (used in water systems)
• DIP - Ductile Iron Pipe (used in sewer and water systems)
• Galvanized (used in water systems)
• HDPE - High Density Polyethylene Pipe (used in stormwater systems and recently in sewer systems)
• PVC - Polyvinyl Chloride Pipe (used in sewer systems)
• RCP - Reinforced Concrete Pipe (used in sewer and stormwater systems)
• Steel (used in sewer systems)
• VCP - Vitrified Clay Pipe (used in sewer systems)

**Policy:** A plan, course of action or a guiding principle designed to set parameters for decisions and actions.

**Potable Water:** Drinking water.

**Primary Treatment:** A wastewater treatment process that takes place in a tank and allows those substances in wastewater that readily settle or float to be separated from the water being treated.

**Purchase Order:** A document issued to authorize a vendor or vendors to deliver specified merchandise or render a specified service for stated estimated price. Outstanding purchase orders are called encumbrances.

**Raw Water:** Untreated water.

**Reserve:** An account used to indicate that a portion of a fund’s fund balance is legally restricted for a specific purpose or commitment and is, therefore, not available for general appropriation.

**Reservoir:** A structure or impoundment for physically storing raw water.

**Revenue:** The term designates an increase to a fund’s asset that does not increase a liability, represent a repayment of an expenditure already made, represent a cancellation of certain liabilities or represent an increase in contributed capital.

**Revenue Bonds:** Bonds where pledges are made to dedicate specific revenue sources to repay the bonds.

**Risk Management:** An organization goal to protect a government’s assets against accidental loss in the most economical method.

**Safe Drinking Water Act (SDWA):** Act passed by the U.S. Congress (most recently amended in 1996) to control drinking water quality.
Secondary Treatment: Usually following primary treatment, secondary treatment employs microorganisms to reduce the level of biochemical oxygen demand (BOD) in wastewater.

Stormwater Utility: A stormwater utility is essentially a special assessment district set up to generate funding specifically for stormwater management. Users within the district pay a stormwater fee, and the revenue thus generated directly supports maintenance and upgrade of existing storm drain systems; development of drainage plans, flood control measures, and water-quality programs; administrative costs; and sometimes construction of major capital improvements.

Supervisory Control and Data Acquisition (SCADA): Equipment and computer technology used to monitor and control the water distribution and wastewater conveyance systems.

Tap Fees: Fees charged to join or to extend an existing utility system. Also referred to as system development fees or connection fees.

Work Load Indicators: Units of work produced by a department or budget unit which indicates the output.
